6 ADVANTAGES OF ENGMA

EXPERTISE IN CONSULTING

Our consulting team possesses extensive experience, deeply understanding business needs and transforming them into innovative technological solutions.

STANDARDIZED PROCESSES

We utilize a clear and structured approach, ensuring all phases from consultation to execution are conducted efficiently and meet high-quality expectations.

EFFECTIVE INVESTMENT

We provide optimal solutions tailored to your budget, ensuring a competitive edge for your business.

COMPREHENSIVE SUPPORT

We commit to long-term partnerships with our clients, offering maintenance, support, and ongoing consultation to ensure sustained success and efficiency.

CUTTING-EDGE TECHNOLOGY

Our talented developers continuously update and apply the latest technologies, ensuring our products remain at the forefront of market trends.

DIVERSE EXPERIENCE

We have successfully implemented hundreds of projects across various sectors, including manufacturing and education, adapting to diverse business needs.

PATNERS

ENGMA is proud to partner with leading companies in Vietnam across various sectors, including e-commerce, healthcare, education, real estate, and manufacturing. This diversity not only showcases our adaptability and creativity but also drives ENGMA to continuously improve, delivering optimal technology solutions tailored to the unique needs of each industry. Together, we create value and promote sustainable development for every business.

PROJECTS

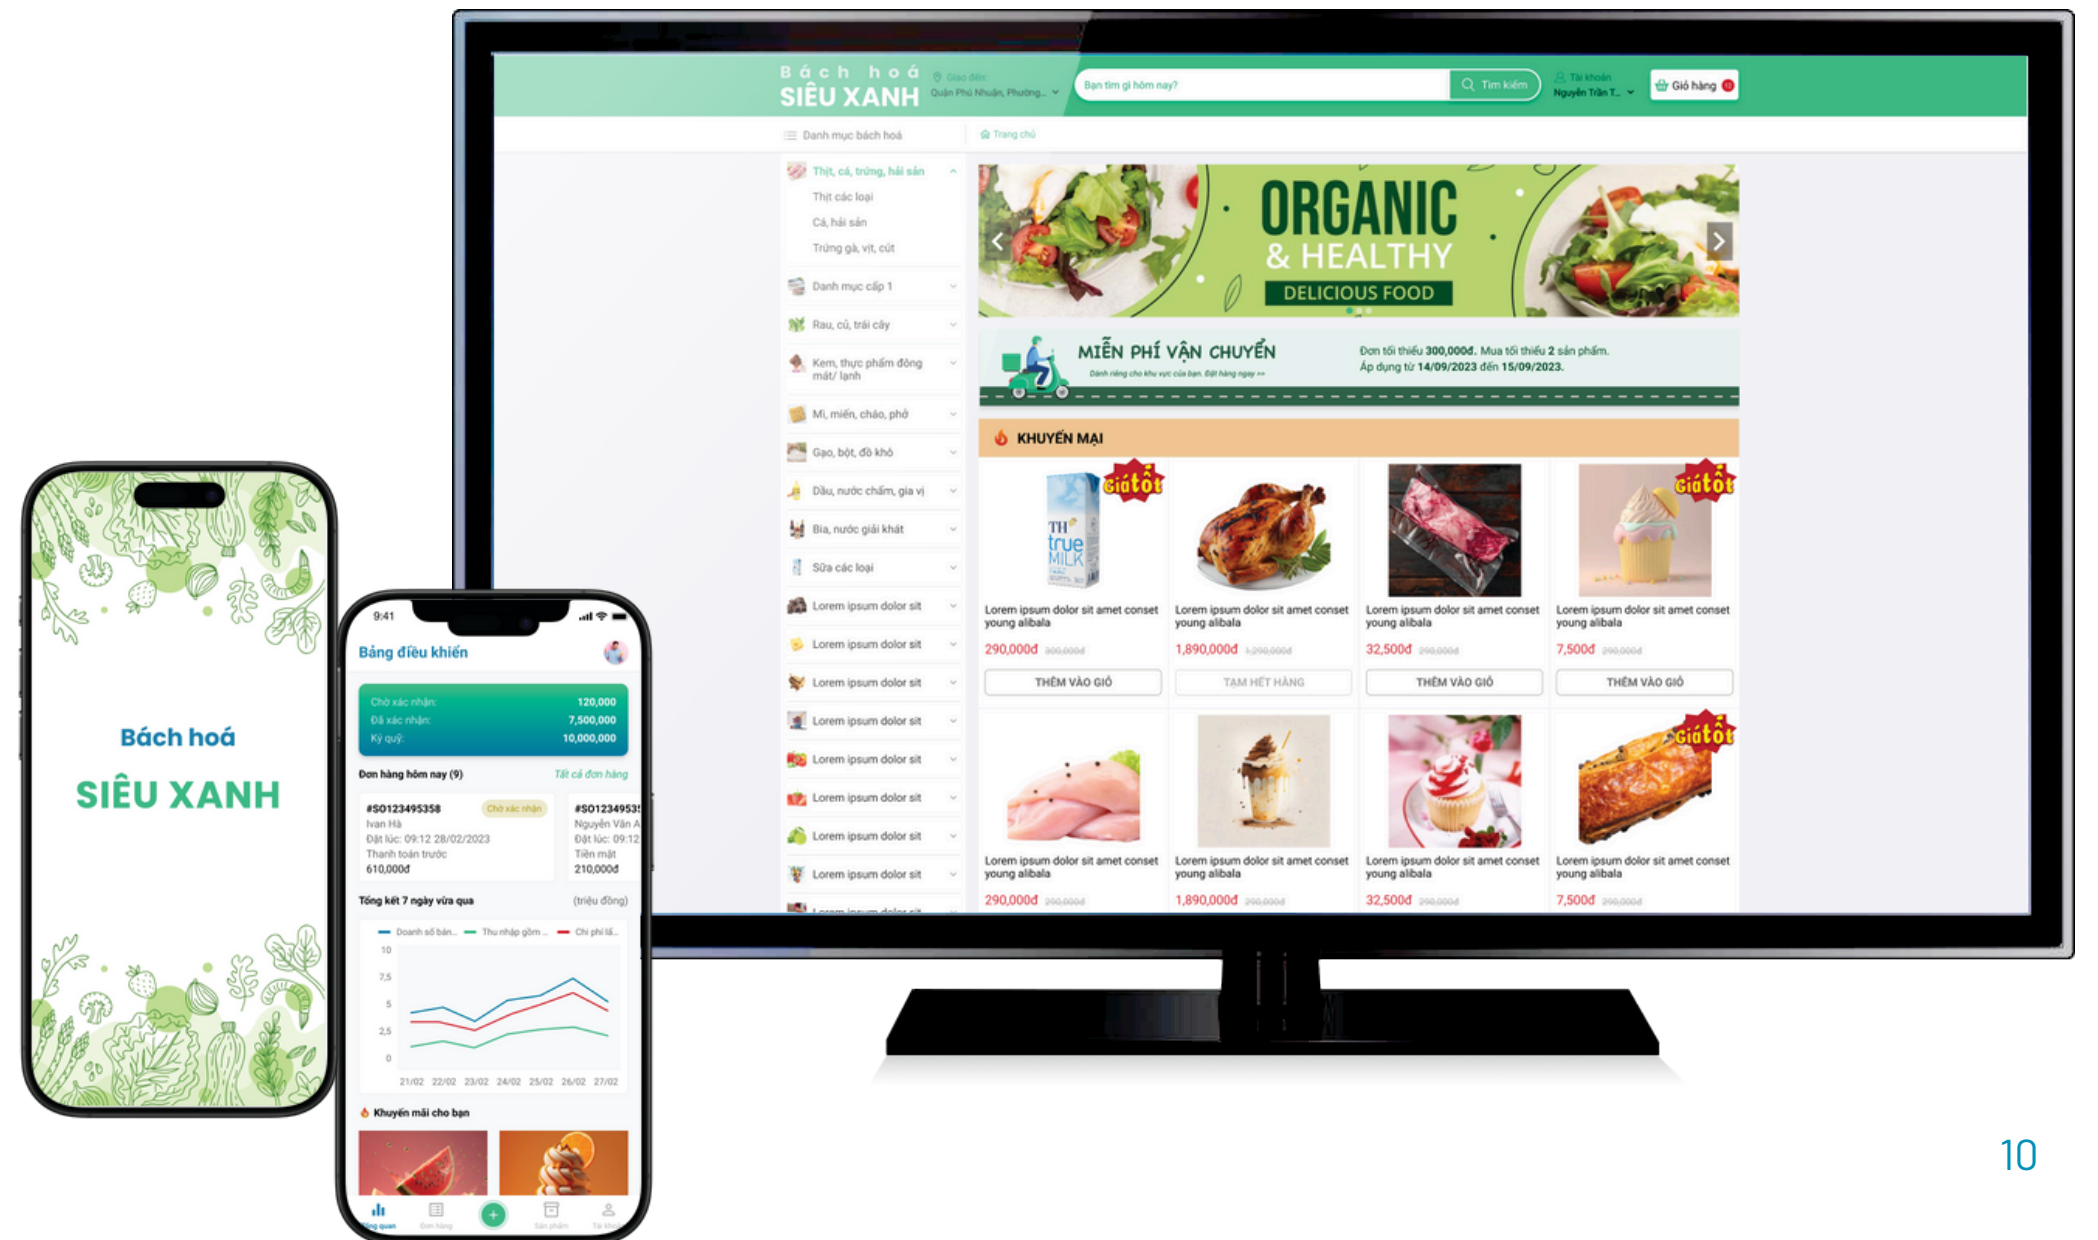

E-COMMERCE PLATFORM

This system is a flexible B2B2C e-commerce platform that allows users to act as both buyers and sellers, enabling them to earn additional income by referring products to others. It integrates a point wallet and Payme e-wallet, connecting with over three different payment gateways to provide the best experience for customers.

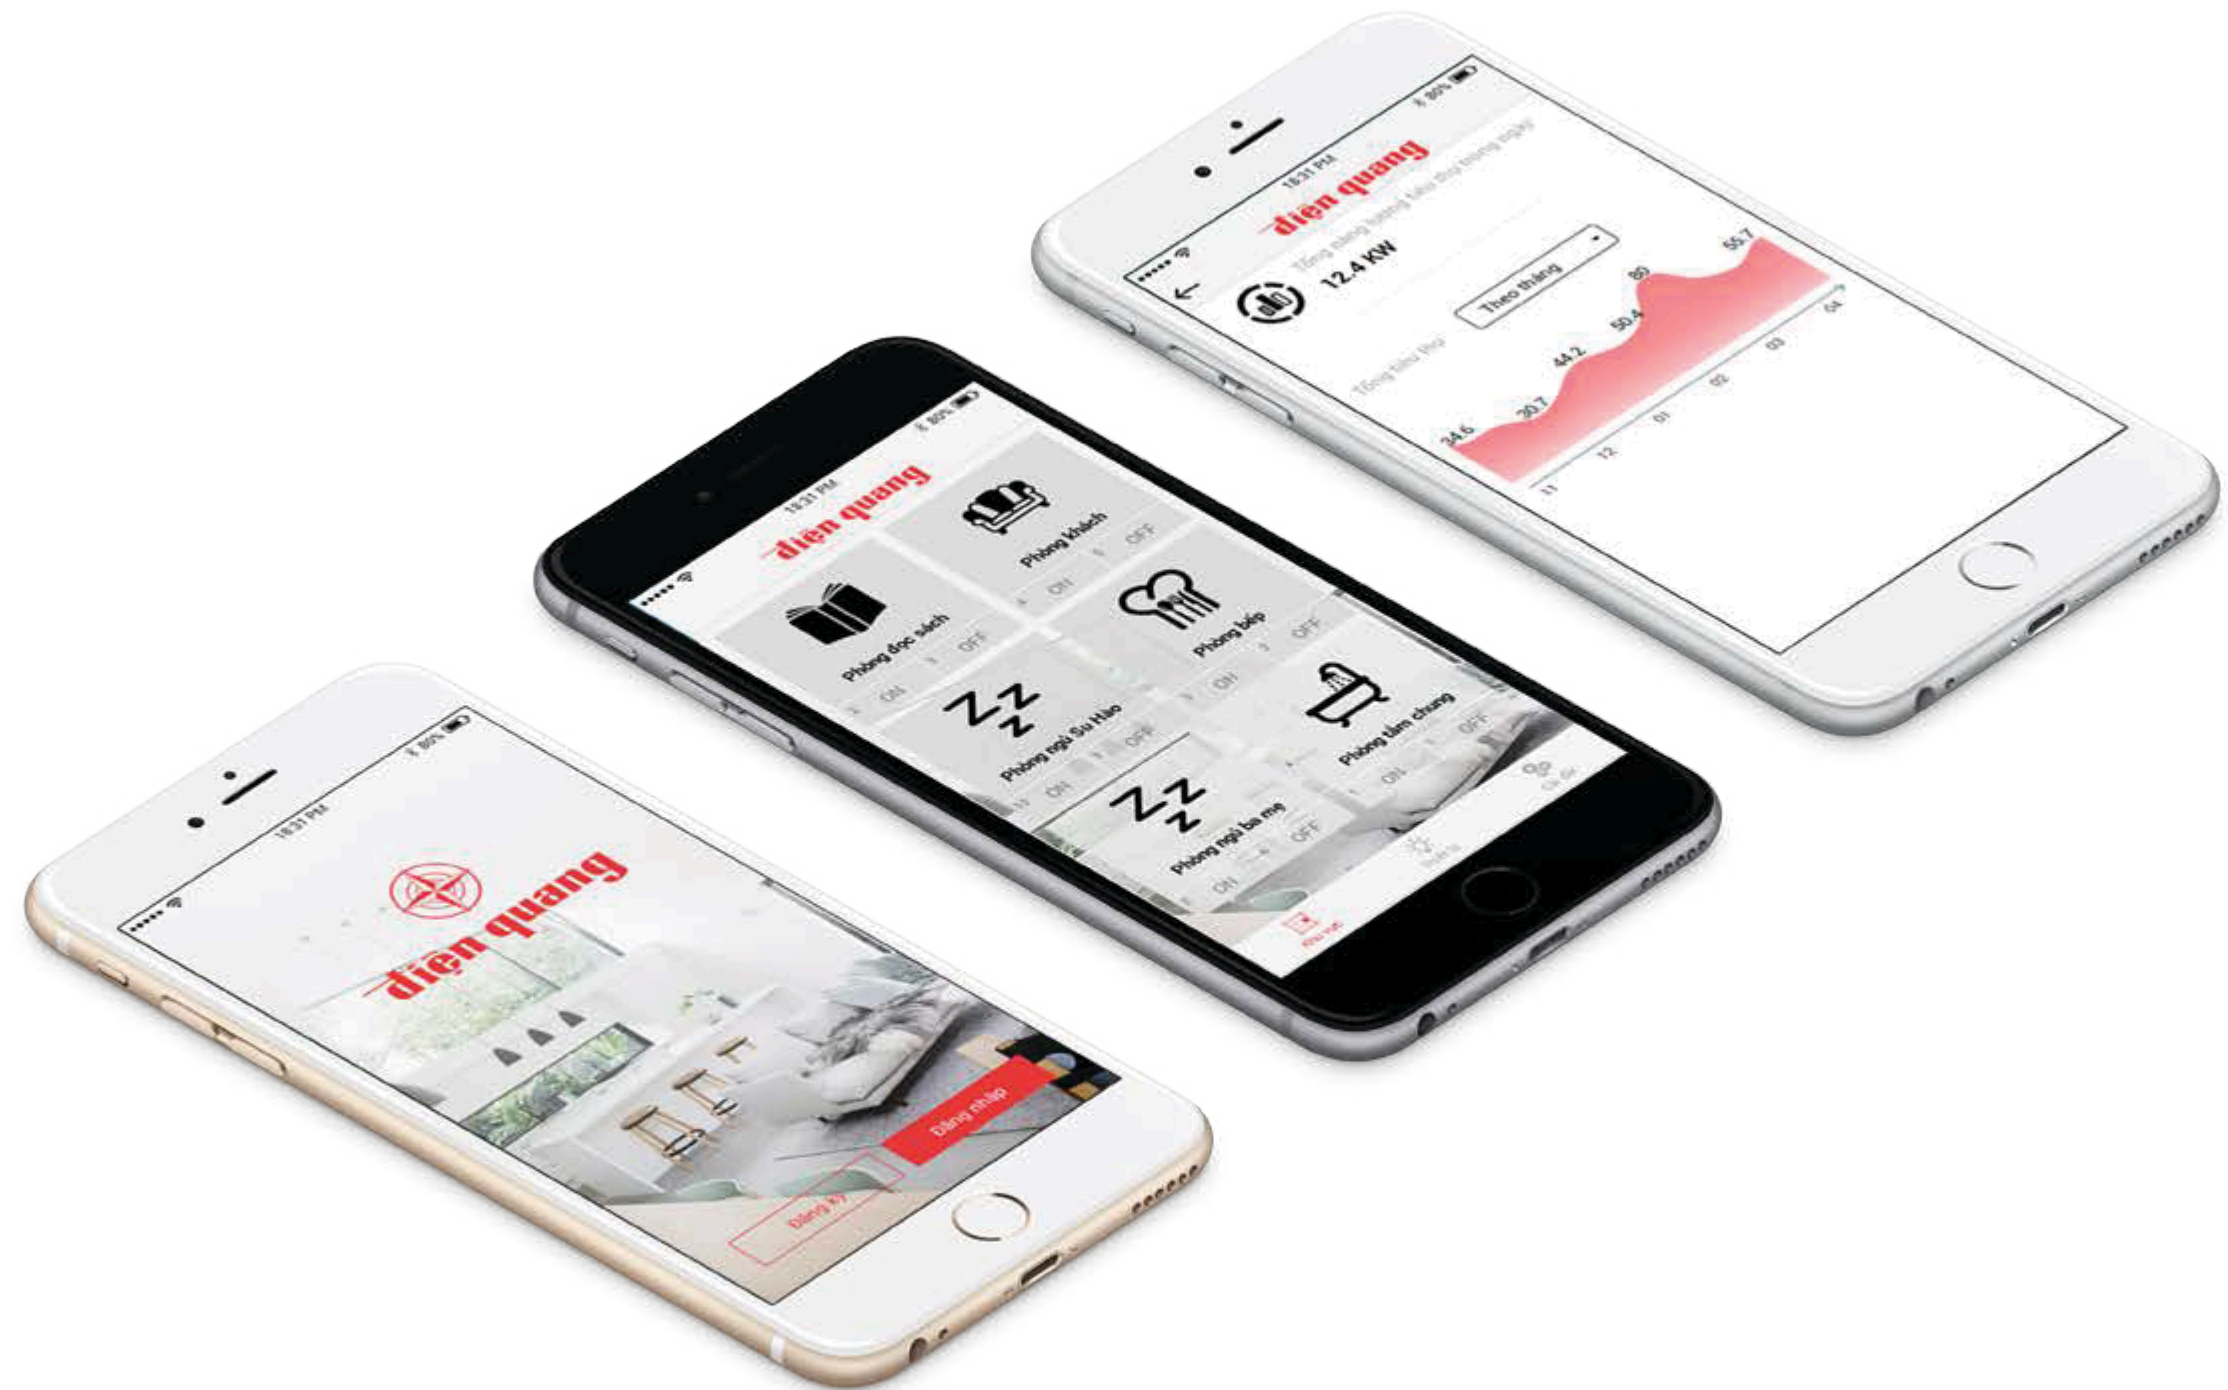

E-COMMERCE PLATFORM

The inventory management application using Odoo ERP software optimizes the sales process from A to Z. With an intuitive interface, sales staff can easily create orders, manage customer information, and track orders until successful delivery. The system automatically updates inventory levels, ensuring precise and efficient stock management.

DIEN QUANG

Users can control electronic devices from anywhere. Through a mobile app, they can manage and schedule the on-off times for these devices.

IOT SOLUTIONS

Develop a mobile application that connects with a server and AI camera, offering baby care features such as temperature monitoring, facial recognition, and breath detection. The target market is customers in Europe and America.

EDUCATION -REPEAT ENGLISH

An intelligent English learning app with a vast vocabulary library. The app automatically adjusts difficulty levels to match each learner's proficiency. With diverse learning packages, you can choose lessons that align with your goals. Enhance vocabulary retention with features for review, testing, and accurate pronunciation practice.

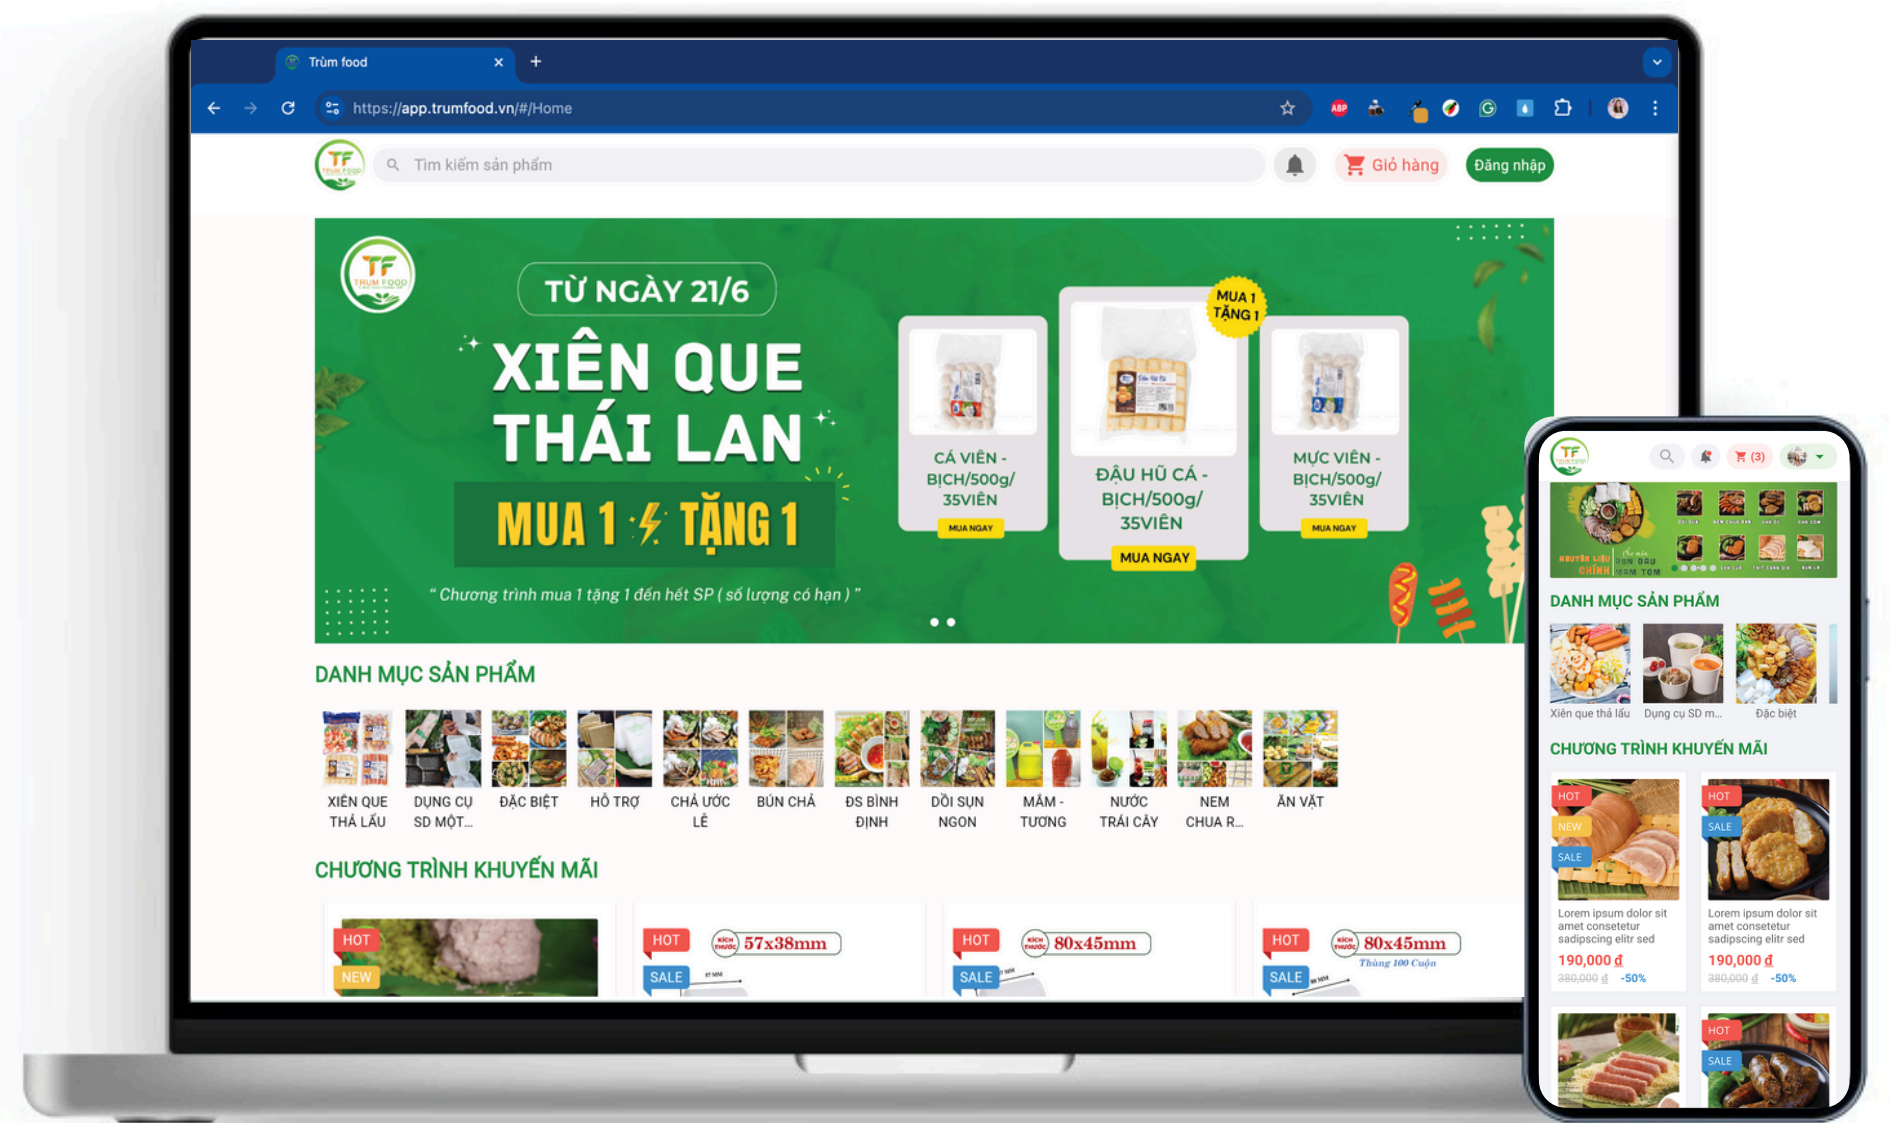

EDUCATION OBEE

Ứng dụng cung cấp phương pháp giáo dục trực tuyến dành riêng cho bộ môn Tiếng Anh. Người dùng có thể xem các bài giảng lý thuyết, làm bài tập và tham gia các cuộc thi giữa người dùng với nhau.

TRUM FOOD ORDER MANAGEMENT

A multi-platform ordering app that allows customers to easily place orders via website, mobile app, or computer. The intuitive order management system helps staff process orders quickly and efficiently. From order placement to successful delivery, all processes are automated, ensuring accuracy and speed.

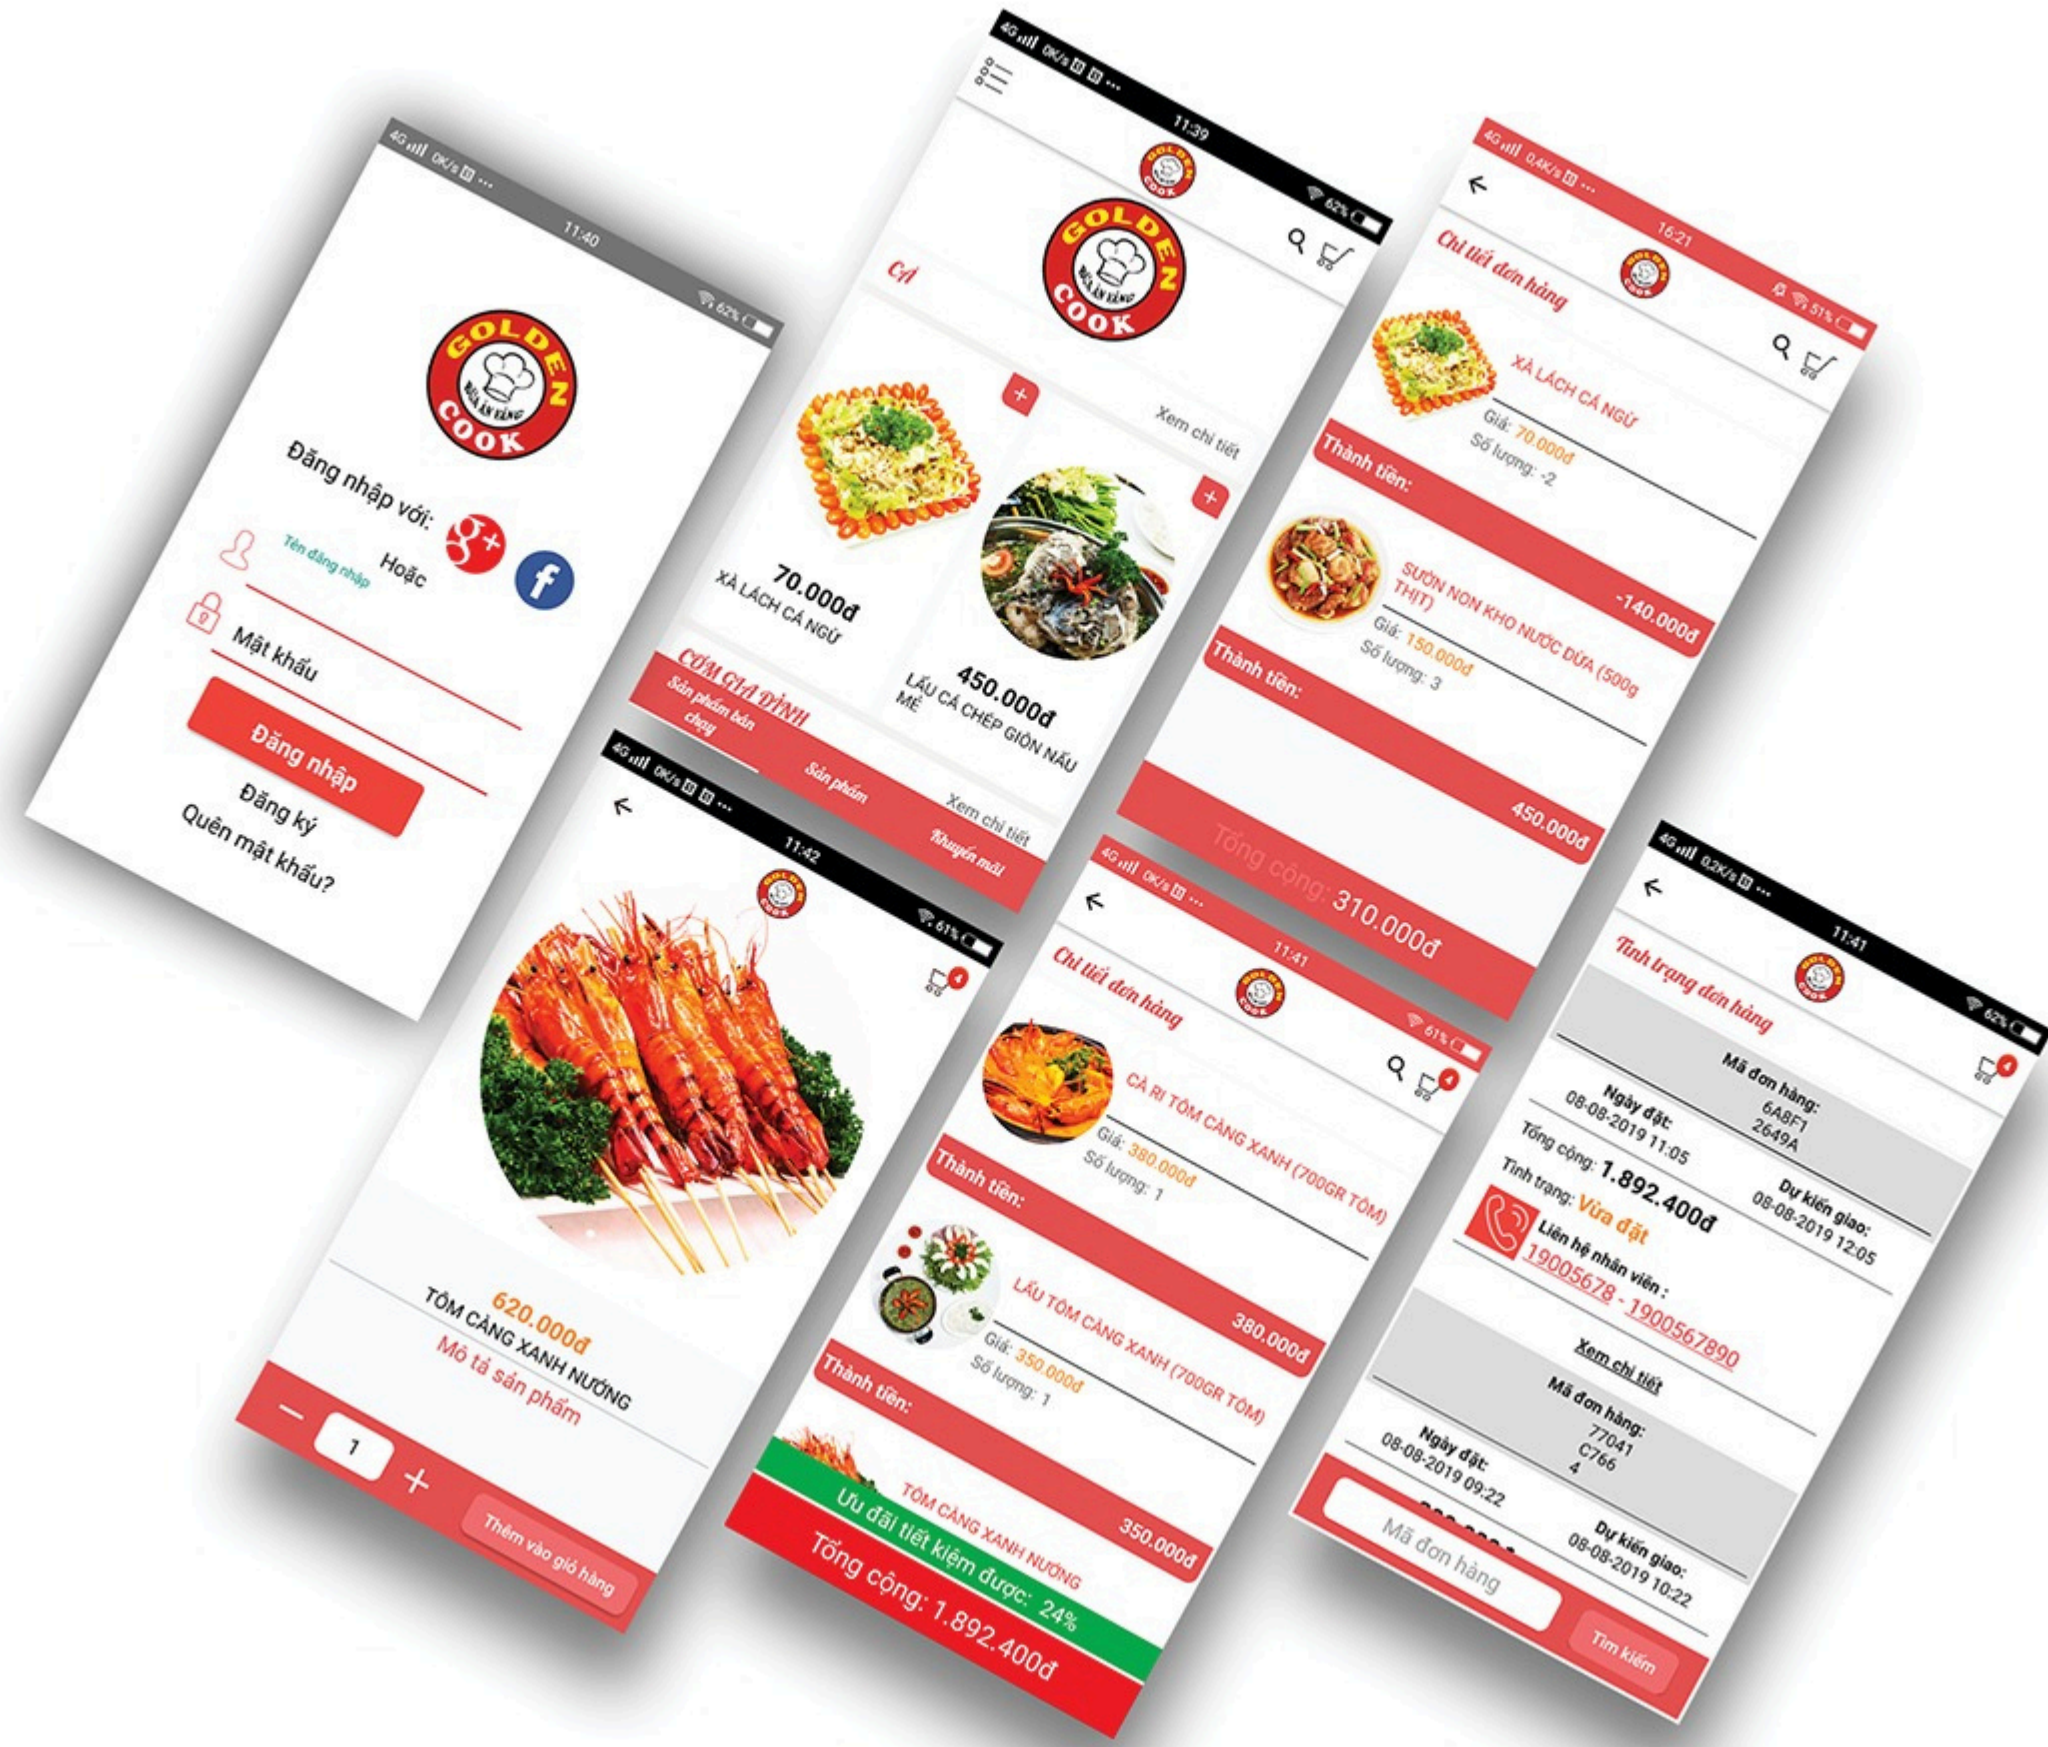

E - COMMERCE PLATFORM HA HIEN

A mobile app designed for customers, restaurants, and food outlets. Key features include: viewing product catalogs, placing and managing orders, processing deliveries, and canceling orders. It supports online COD payments, allows users to accumulate points for discounts, and provides a list of distributor locations.

E - COMMERCE PLATFORM GOLDEN COOK

An e-commerce app designed for direct customers. Key features include viewing order details, placing orders, online payments, earning reward points, receiving notifications, and accessing promotional offers.

MANAGEMENT

The purpose is residential management. This platform connects management boards and residents with smart, modern features, enabling quick information exchange and monthly payment processing directly through the app. It records transaction history and provides essential services such as cleaning, air conditioning repair, food ordering, travel, posting buy/sell ads, and renting apartments or land.

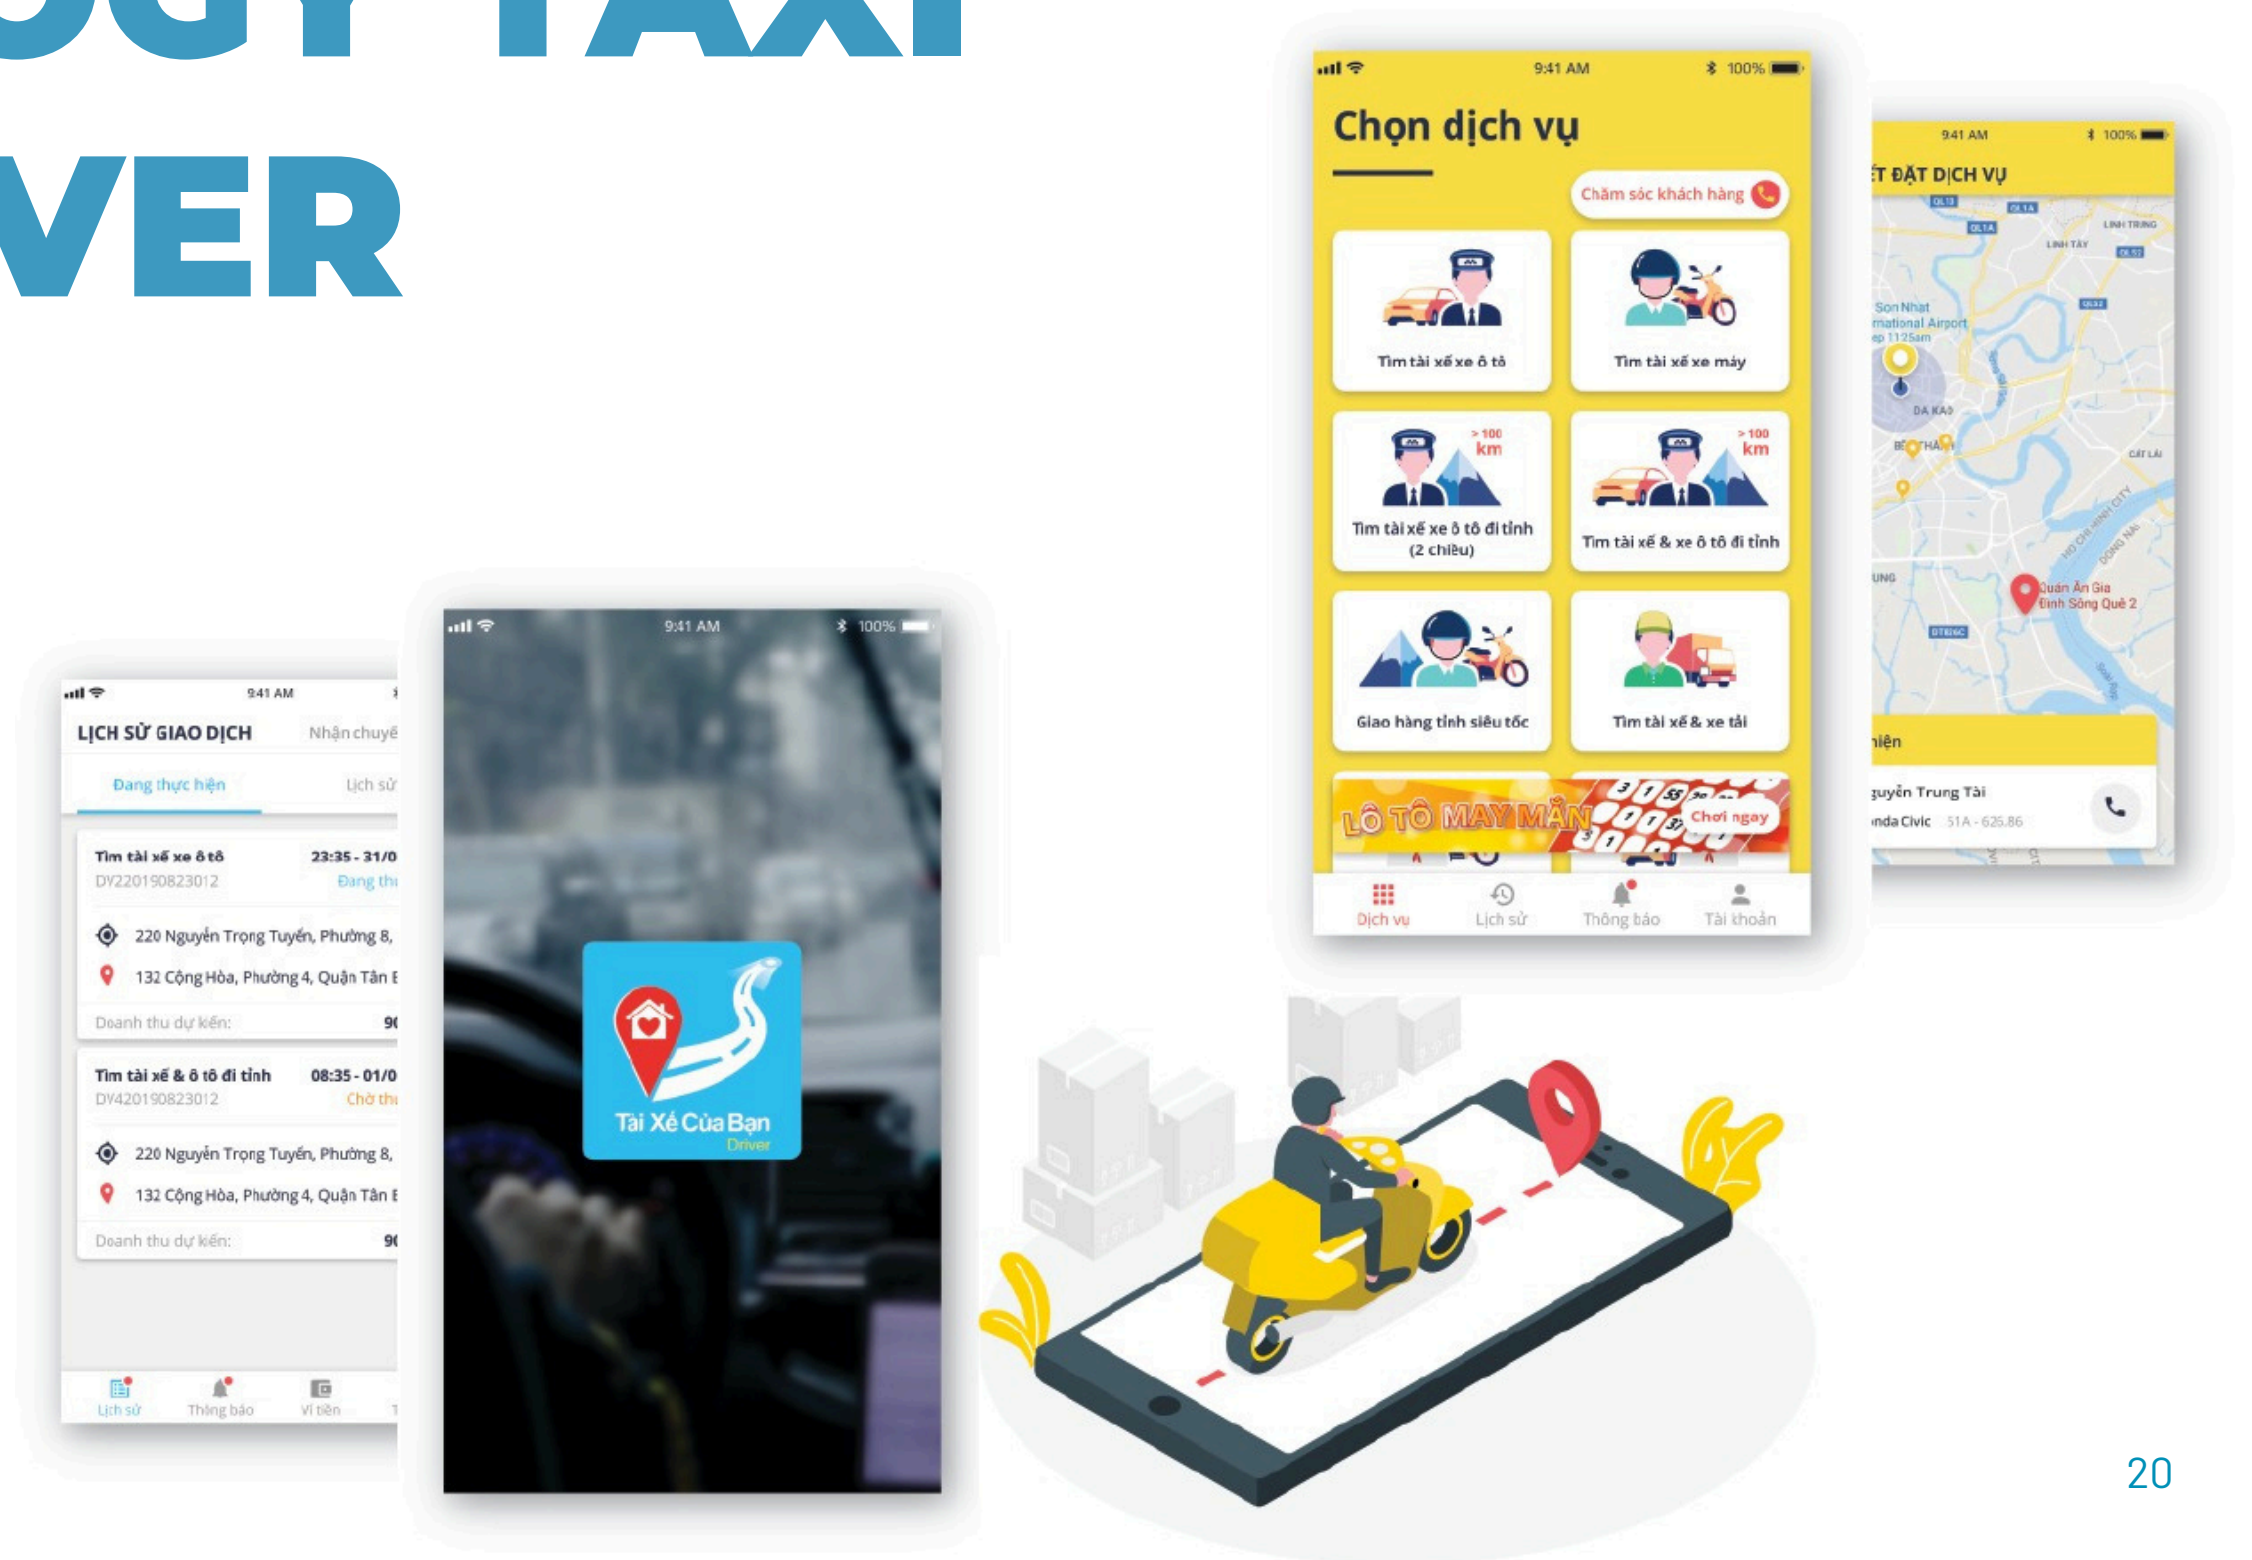

TECHNOLOGY TAXI THUAN THANH

With just a few simple steps on the app, customers can easily find and book a truck suited for moving homes, warehouses, or offices. Our diverse fleet caters to all transportation needs. Drivers can also easily manage orders and track routes through the app.

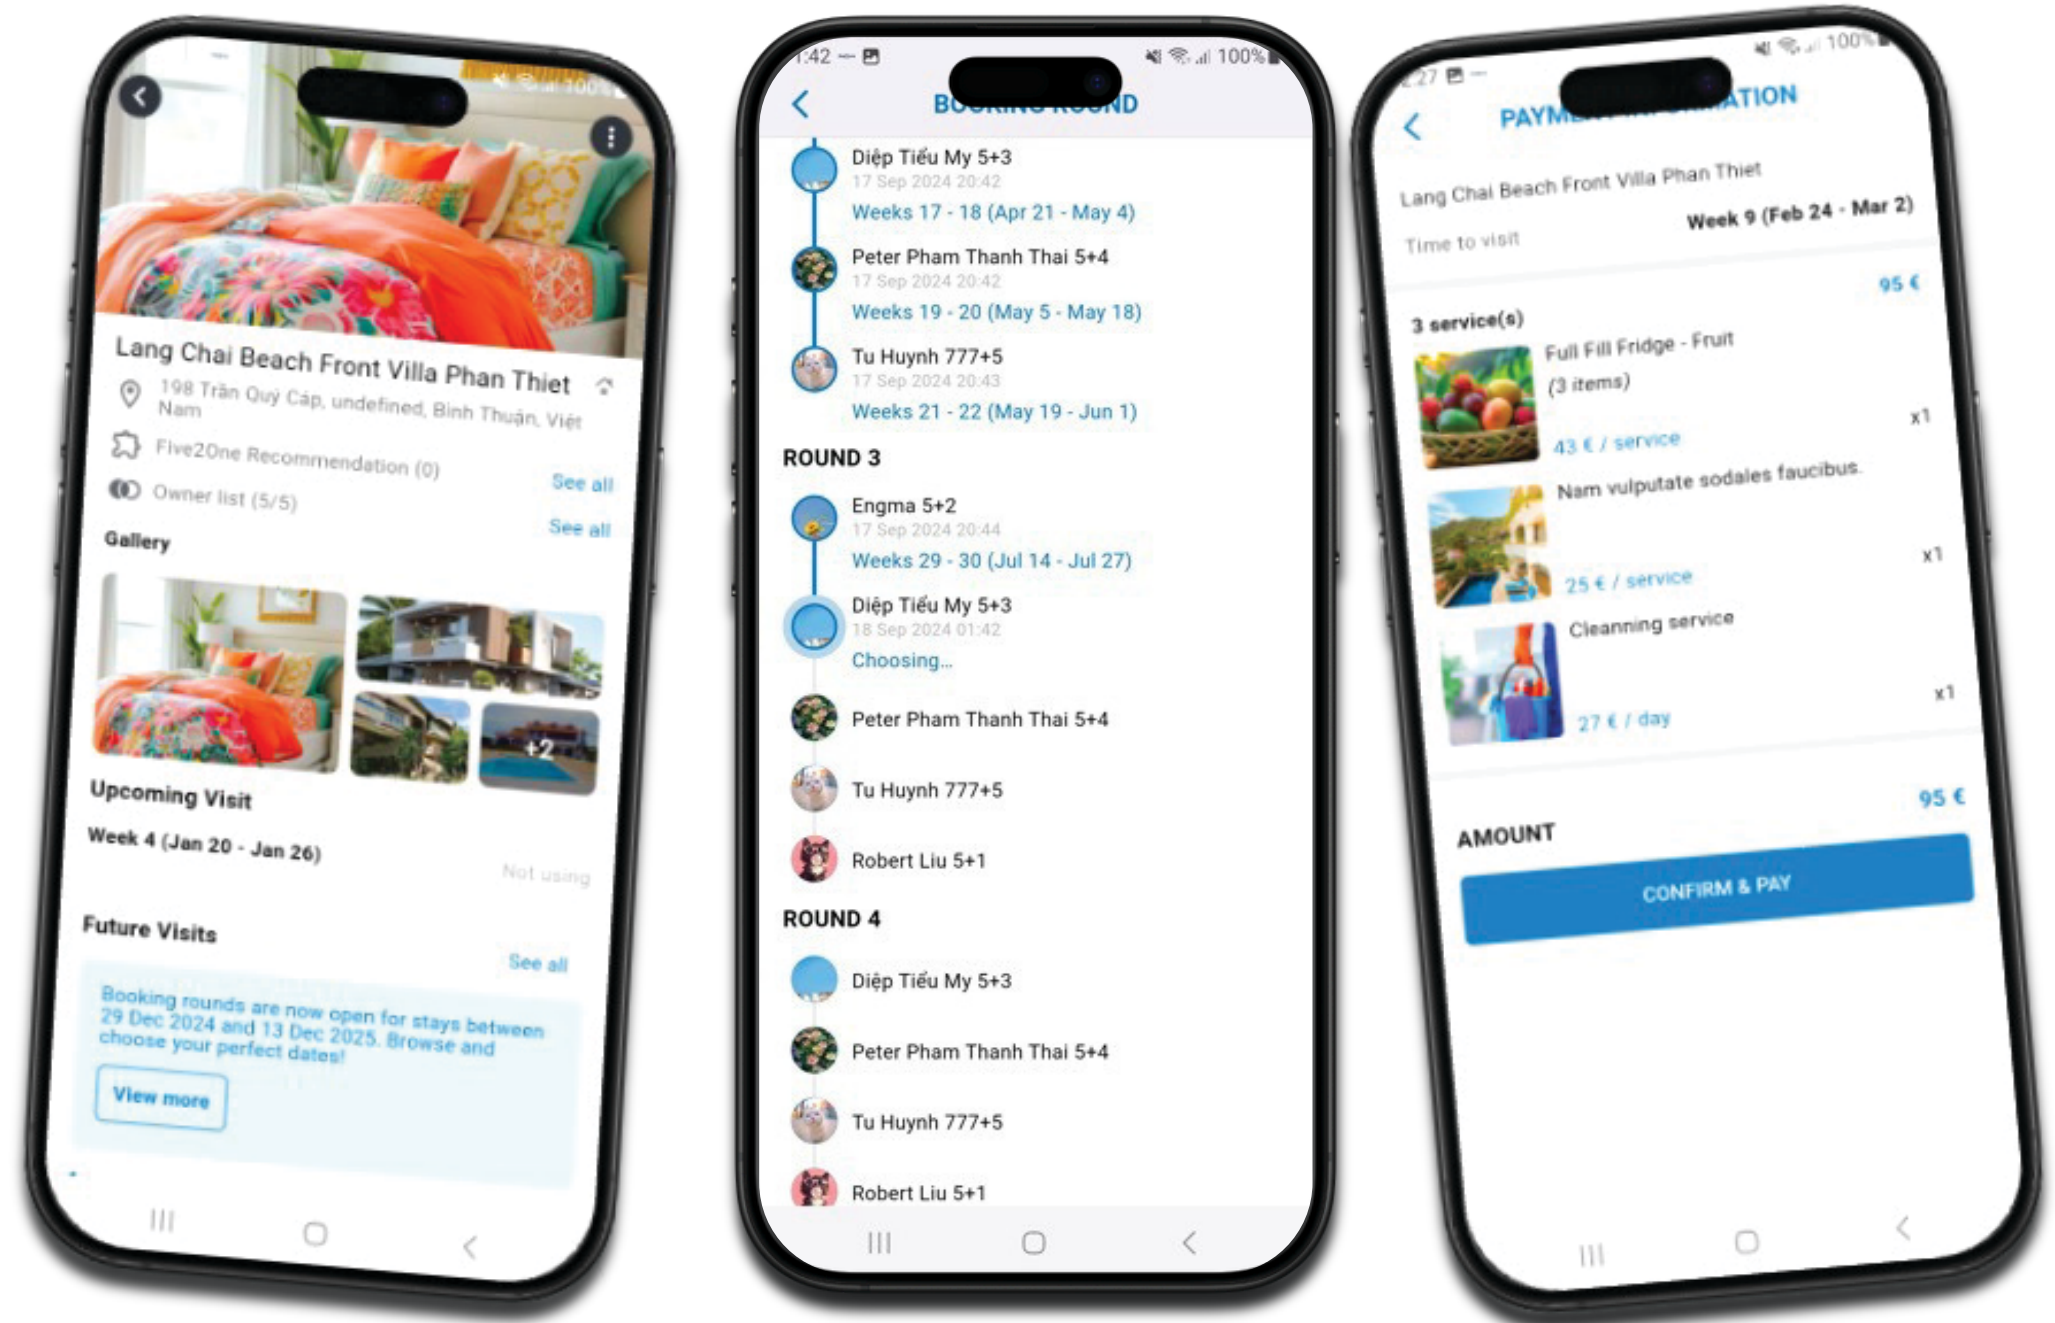

TECHNOLOGY TAXI YOUR DRIVER

Your Driver is the first app in Vietnam for booking motorcycle or car drivers. It connects customers with drivers, allowing quick bookings and providing drivers with extra income during their free time. Additionally, the app features trip sharing, ensuring peace of mind for loved ones by keeping them informed of your travel route.

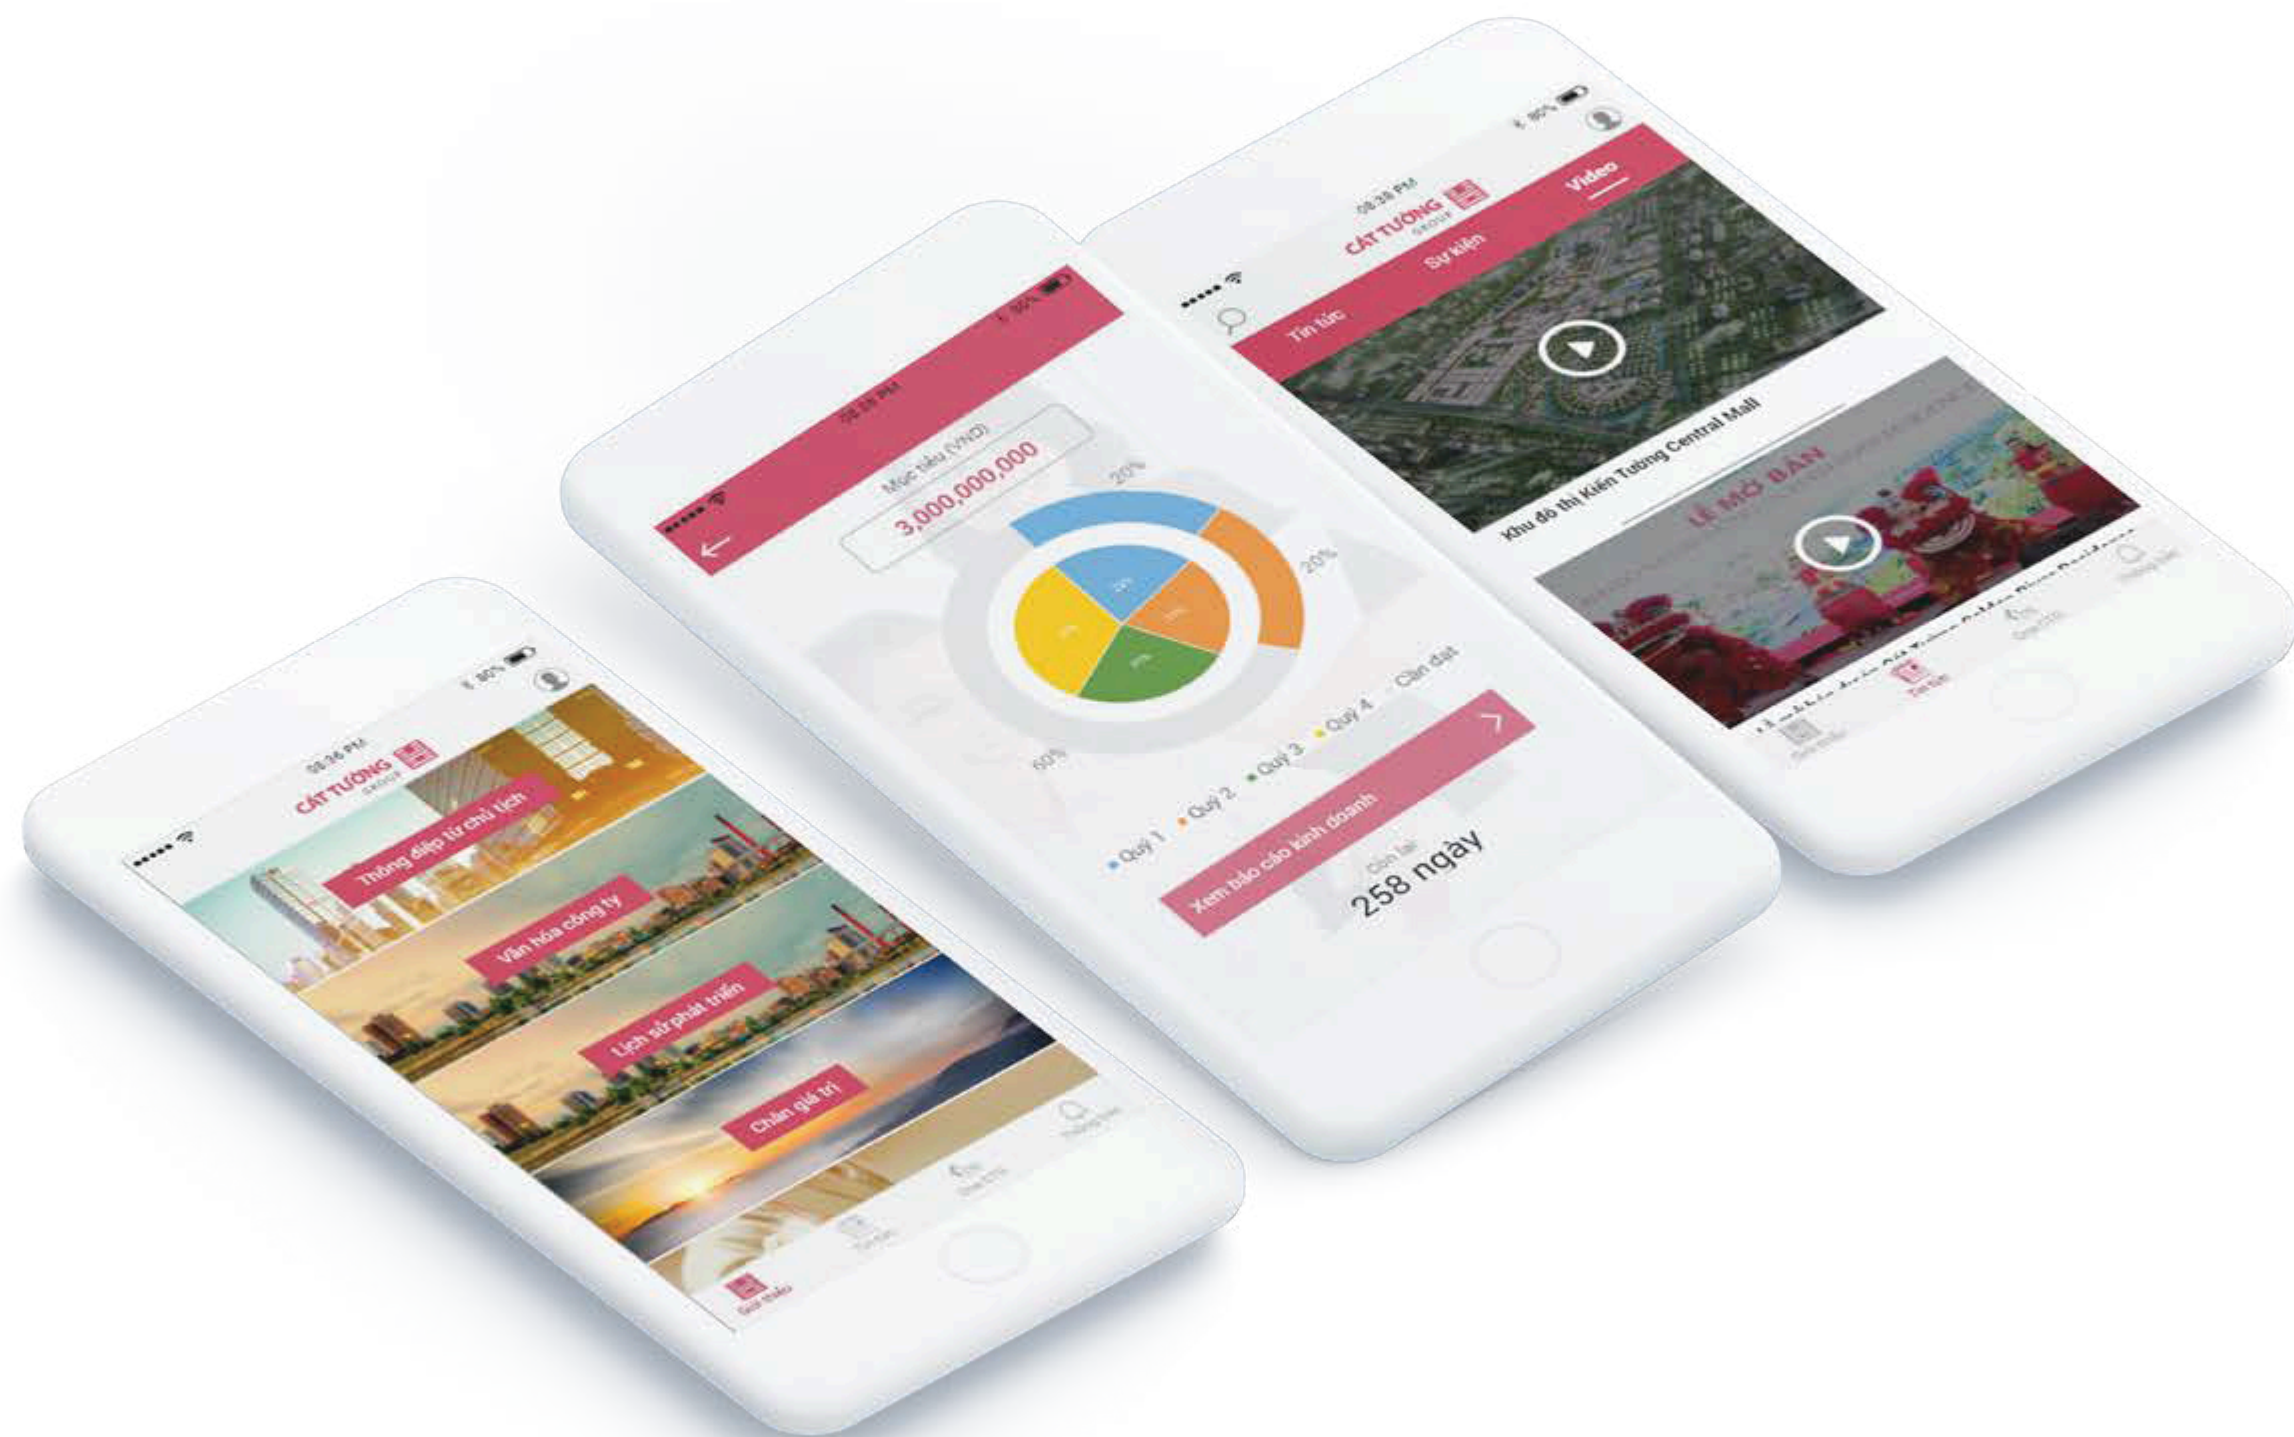

REAL ESTATE FIVE2ONE

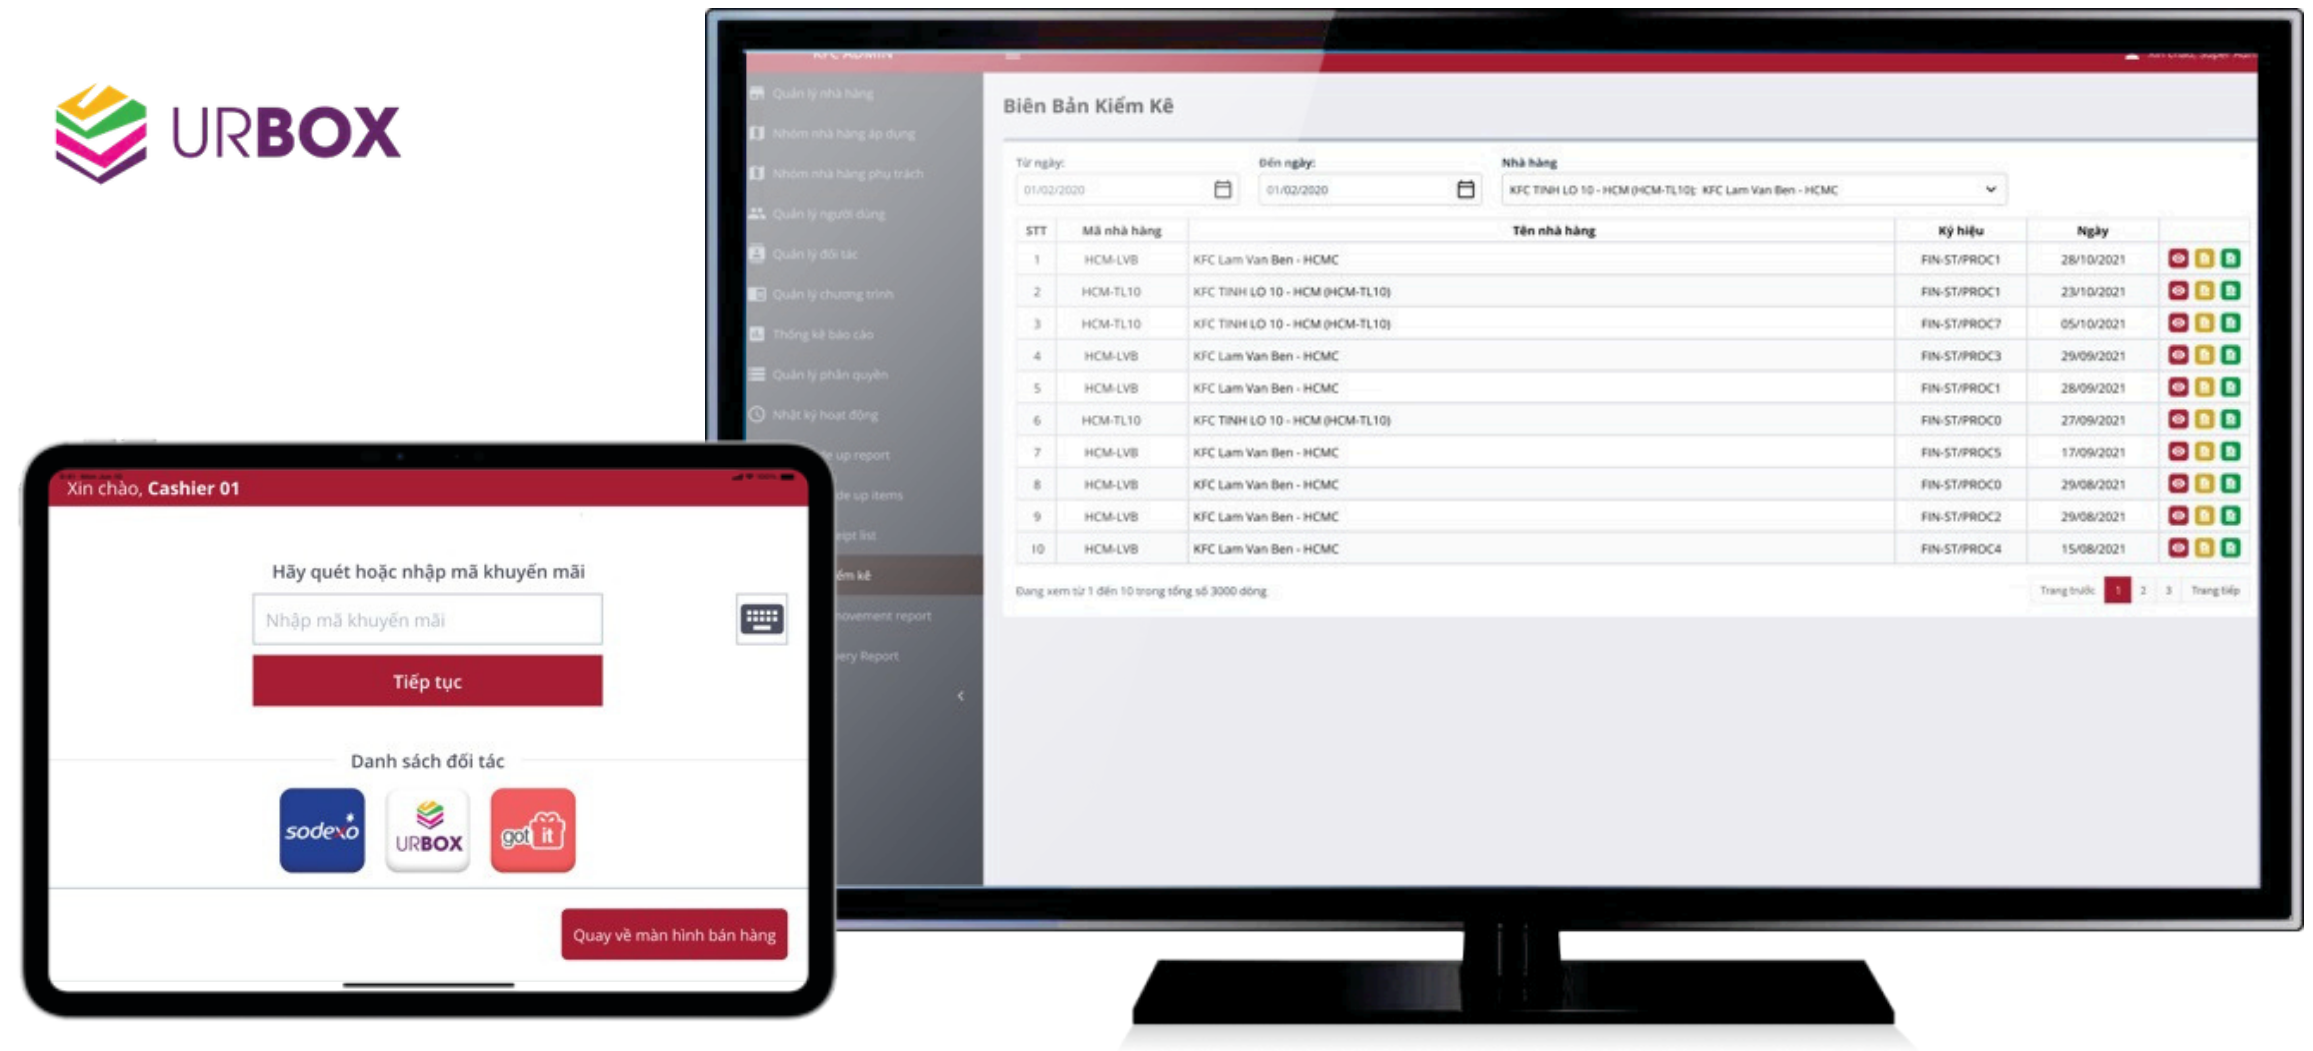

The app is the perfect solution for managing shared real estate assets among multiple owners. It allows the creation of detailed usage schedules for each person, ensuring fairness and transparency. Key features include scheduling usage, tracking transaction history, managing shared expenses, booking services for visits, and receiving notifications.

REAL ESTATE

The app provides comprehensive internal information for Cat Tuong Group, including community activities and business operations to introduce and sell real estate projects. It also tracks and checks whether the plans set by the Board of Directors are achieved.

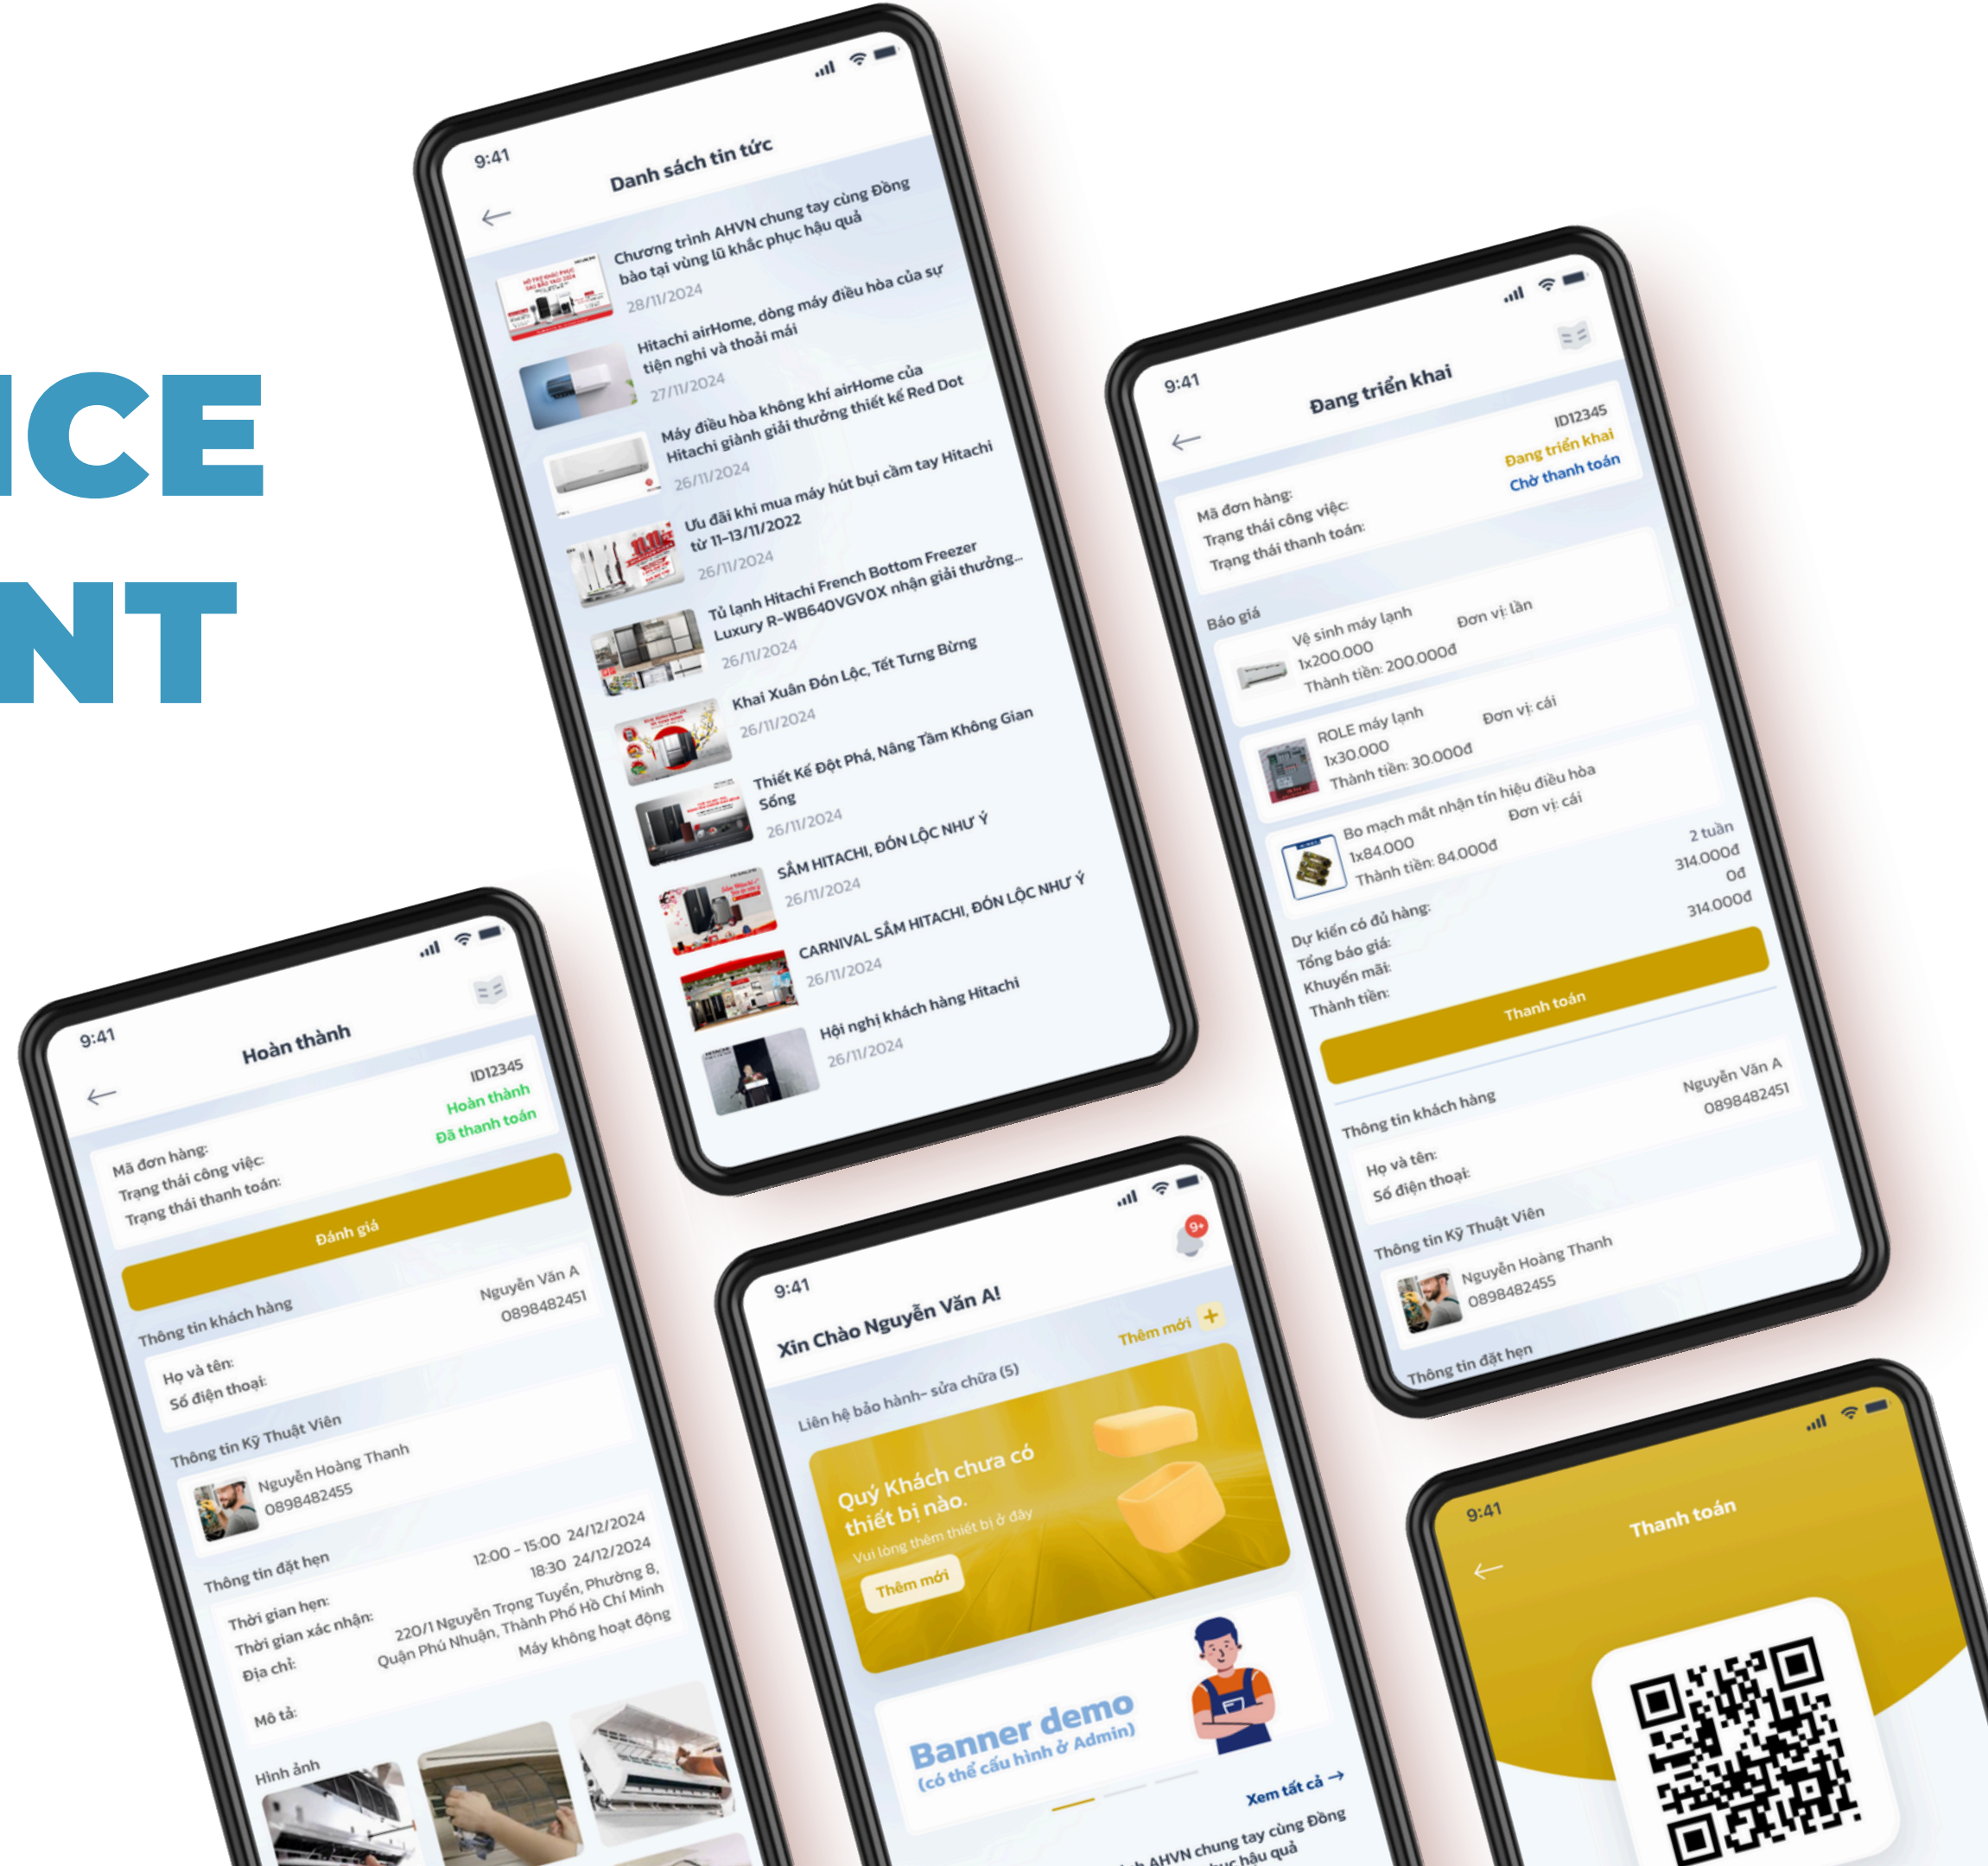

E-VOUCHER

The Middleware system generates electronic e-vouchers, linking with third parties like Gotit, Sodexo, and Urbox. It facilitates sales and gift exchanges within KFC's nationwide point-of-sale system, ensuring seamless and instant transactions.

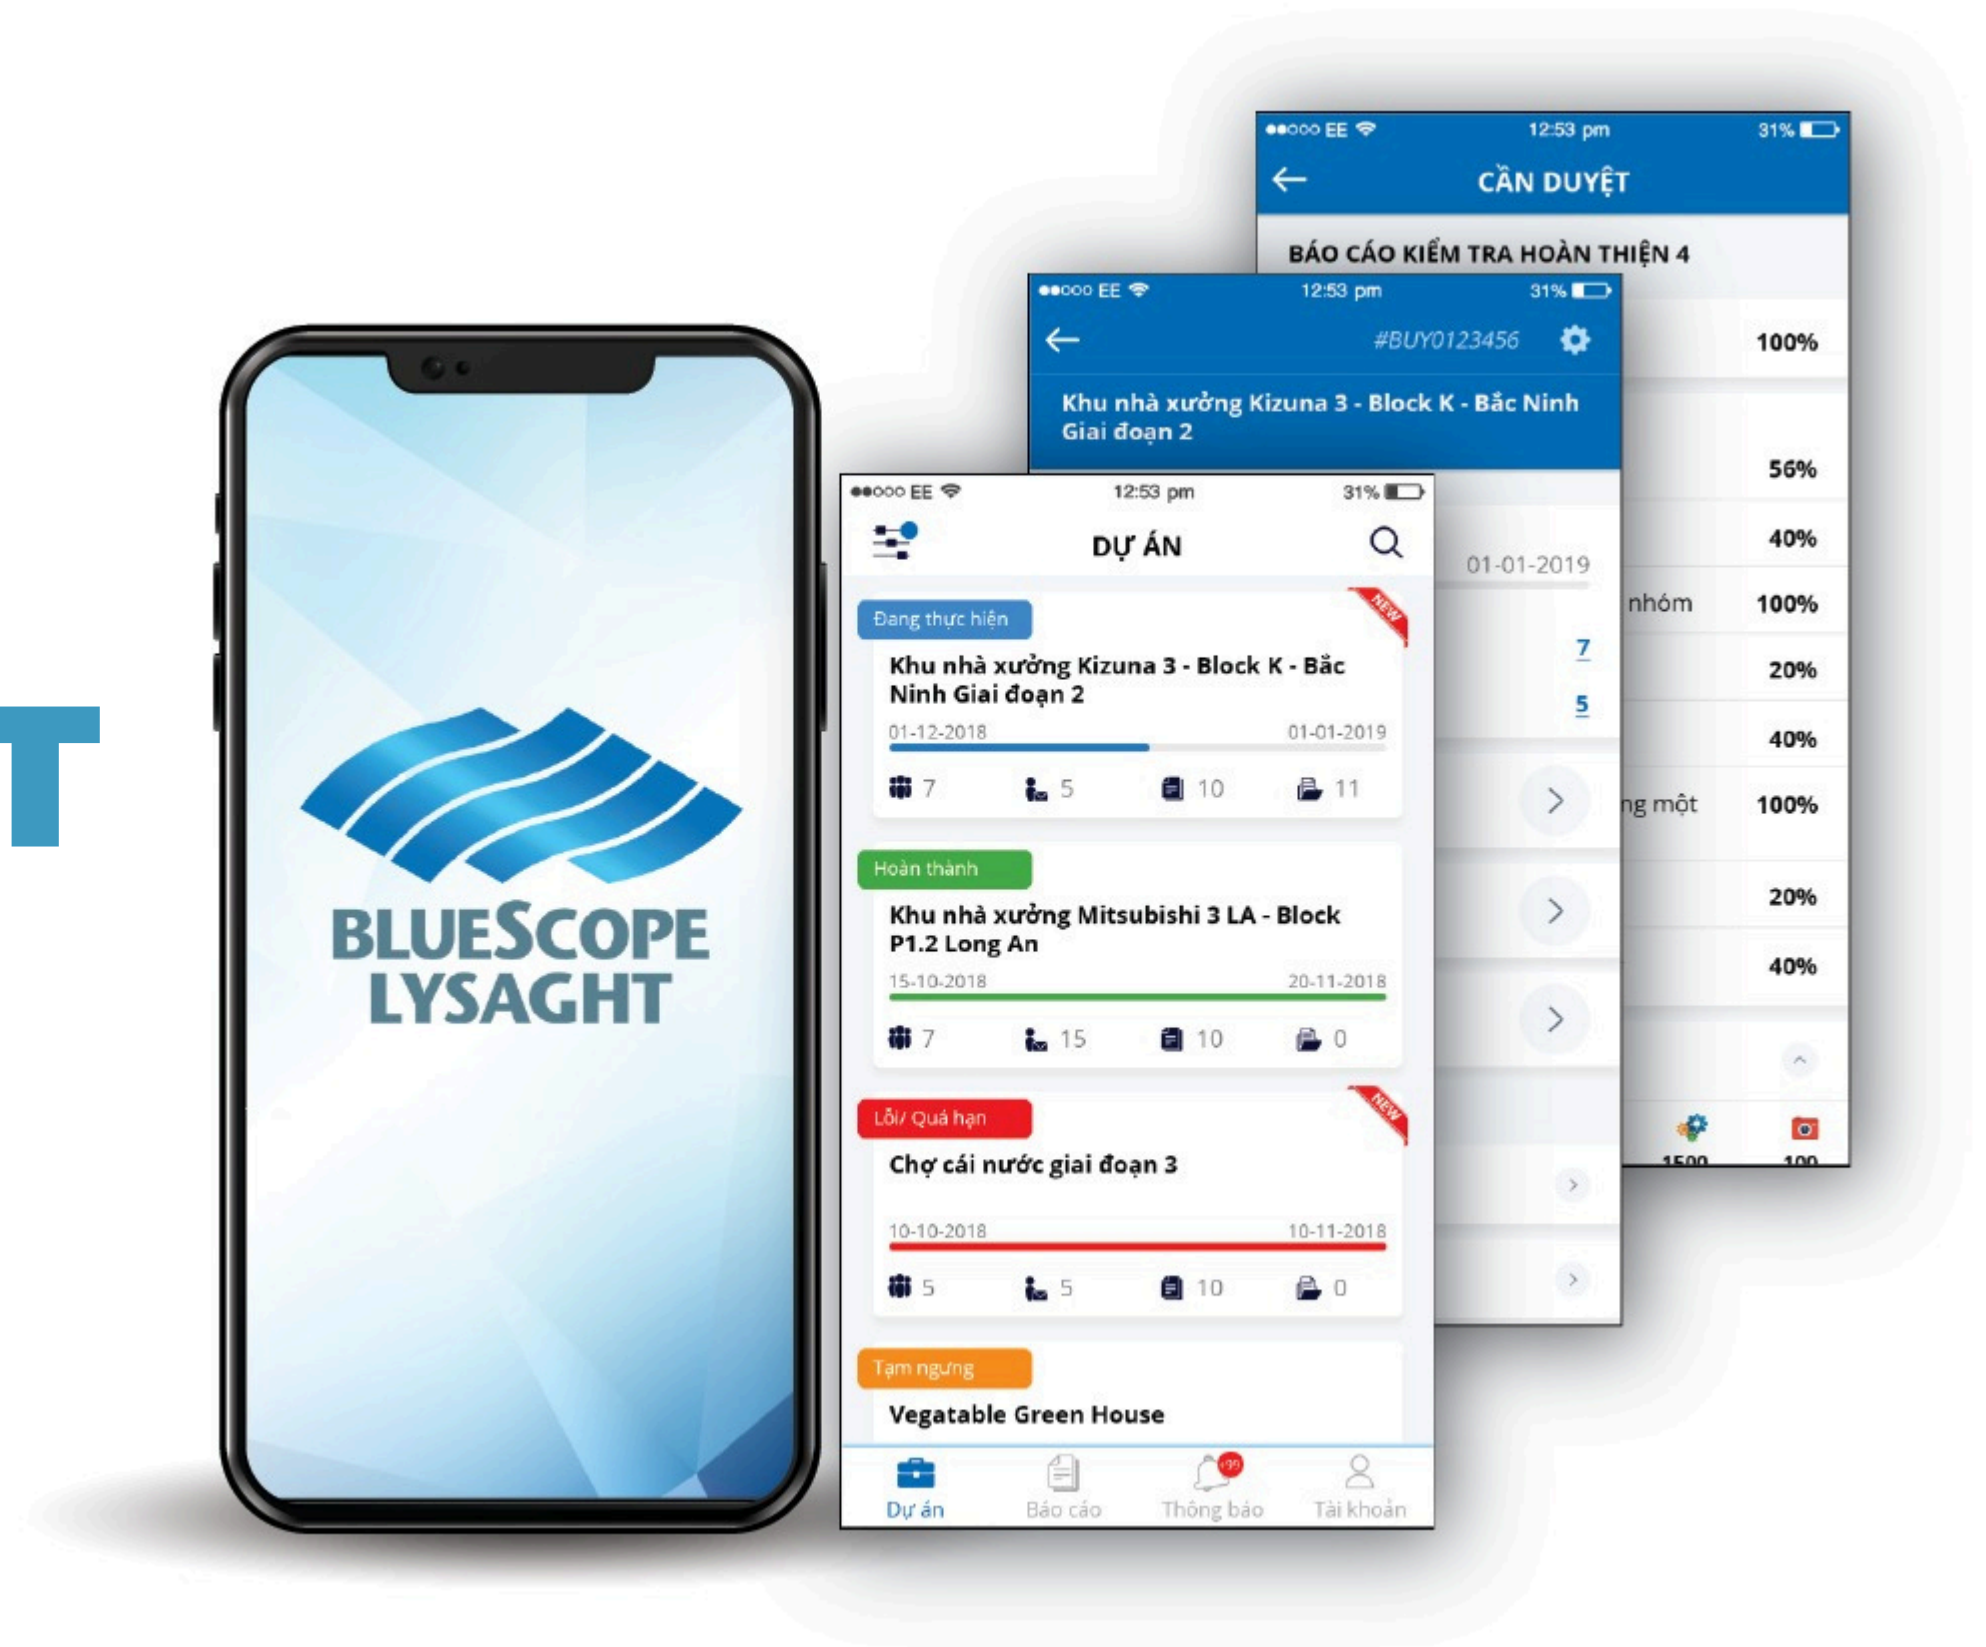

EQUIPMENT MAINTENANCE MANAGEMENT APP - BH

The Equipment Maintenance Management App - BH optimizes maintenance processes, warranty tracking, and service scheduling. Users can add devices, activate warranties, and receive maintenance reminders. The app supports service bookings, order tracking, QR code payments, news updates, and provides online chat support.

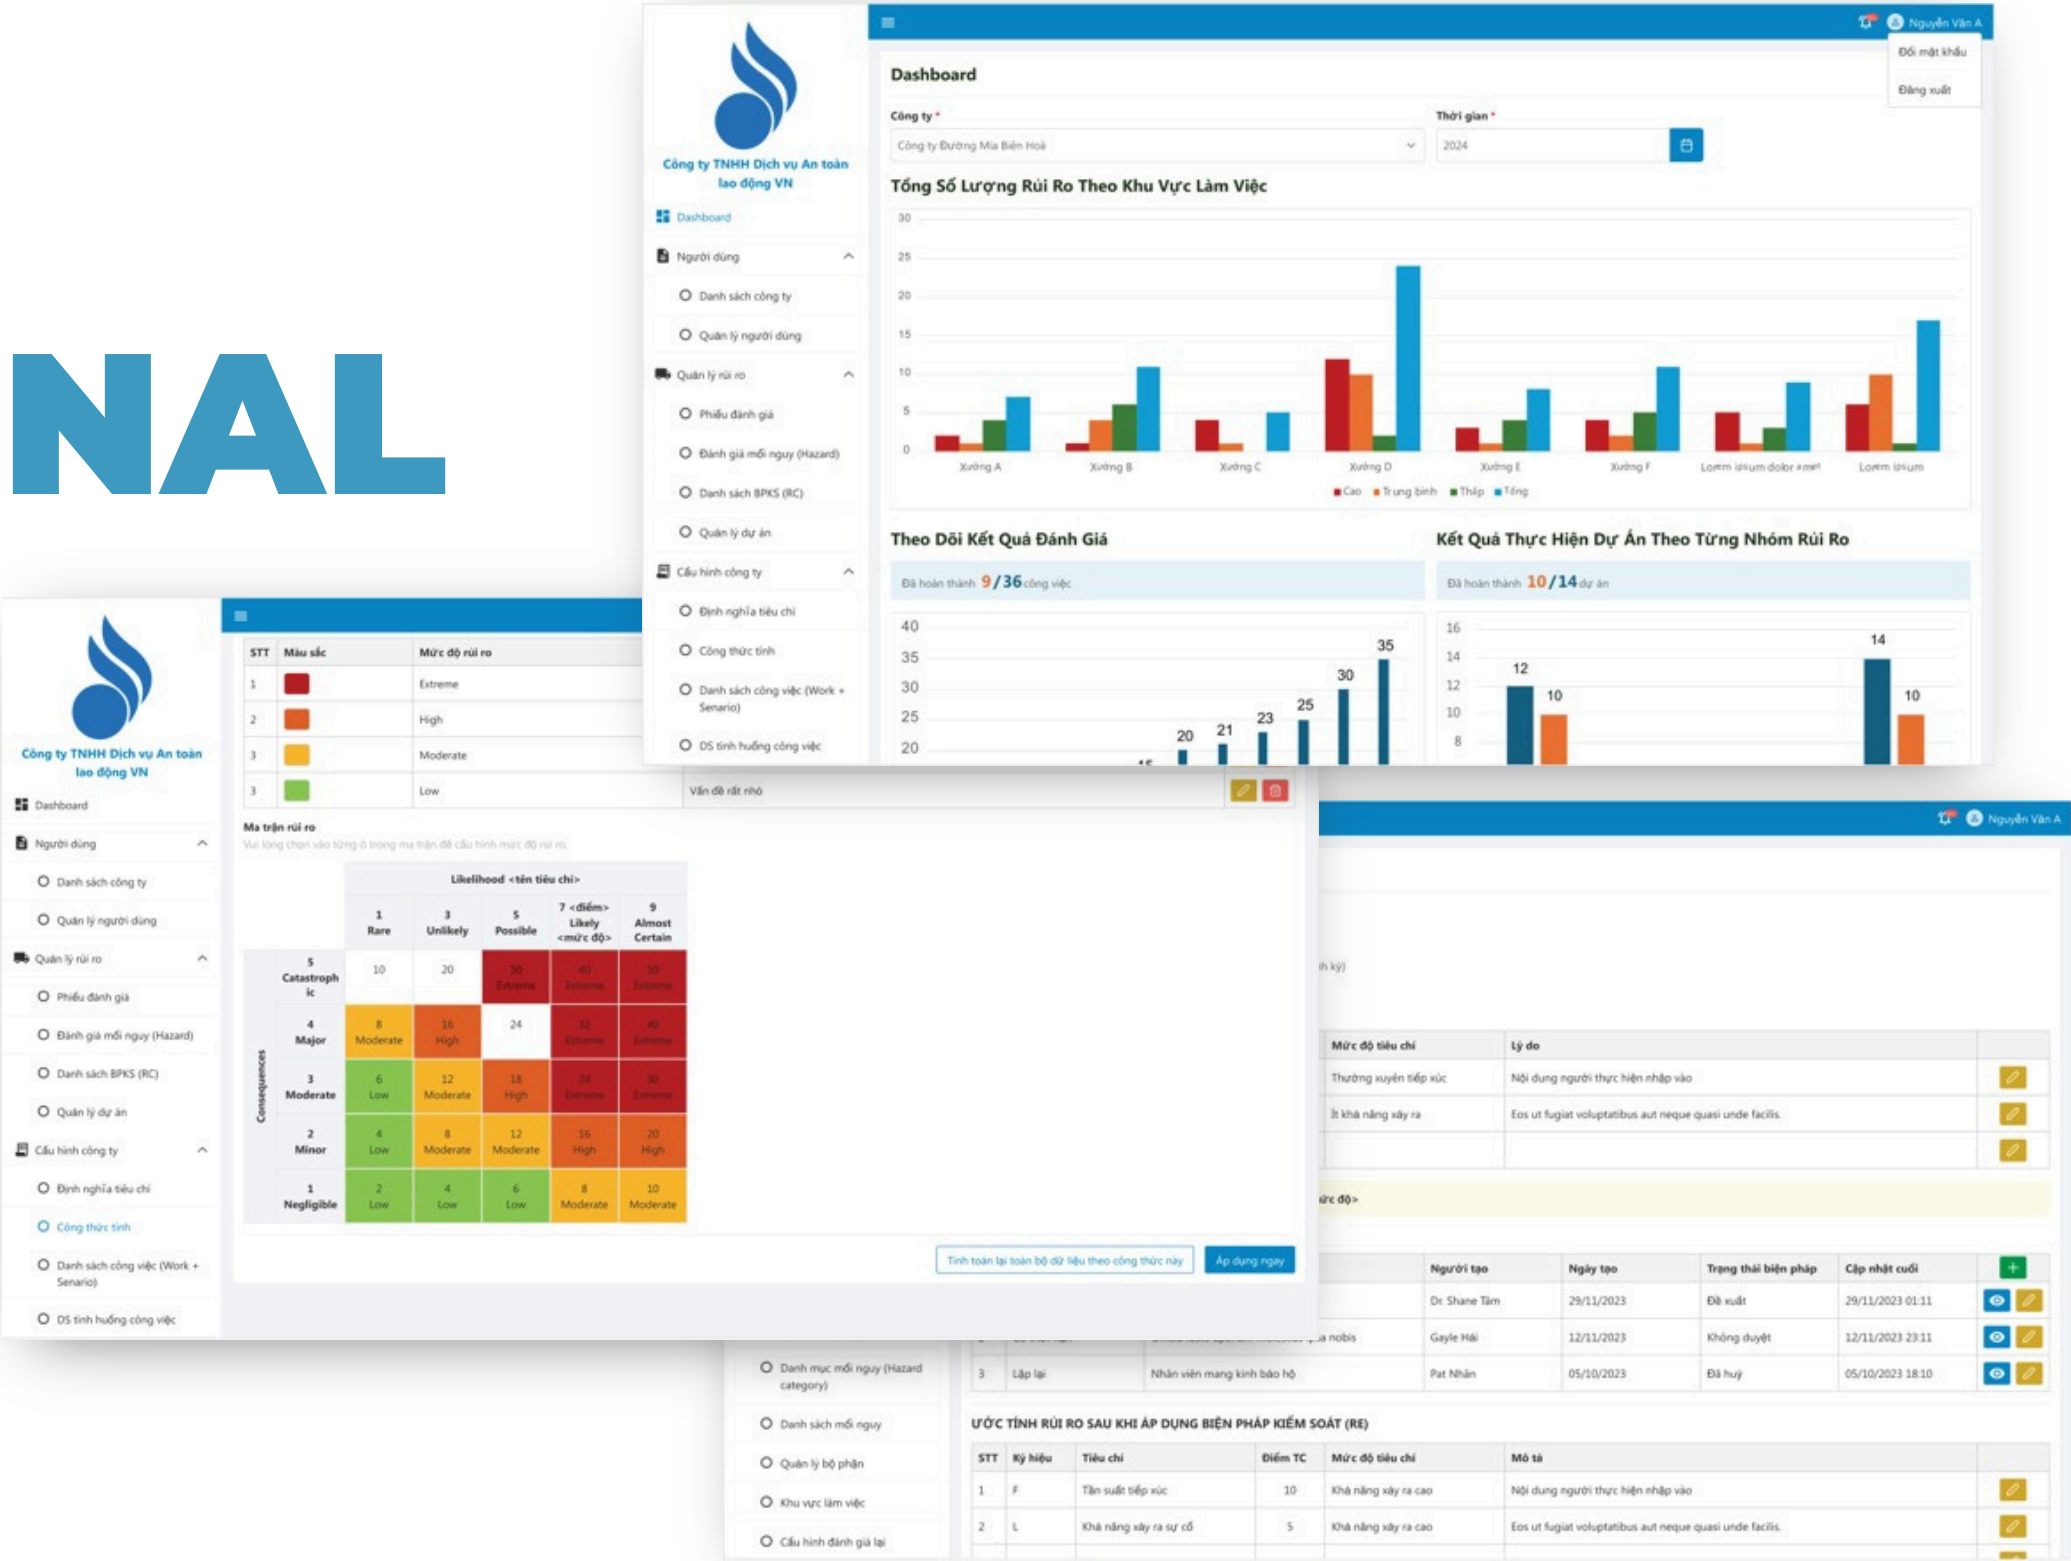

PRODUCT QUALITY MANAGEMENT

The app enables staff to manage work content and report actual quality, helping managers track the progress and quality of employees' work on each project.

OCCUPATIONAL SAFETY

Our occupational safety risk management system helps businesses fully comply with state regulations. Featuring risk assessment, prevention planning, and efficiency tracking, the system minimizes workplace accidents, protects employee health, and enhances productivity.

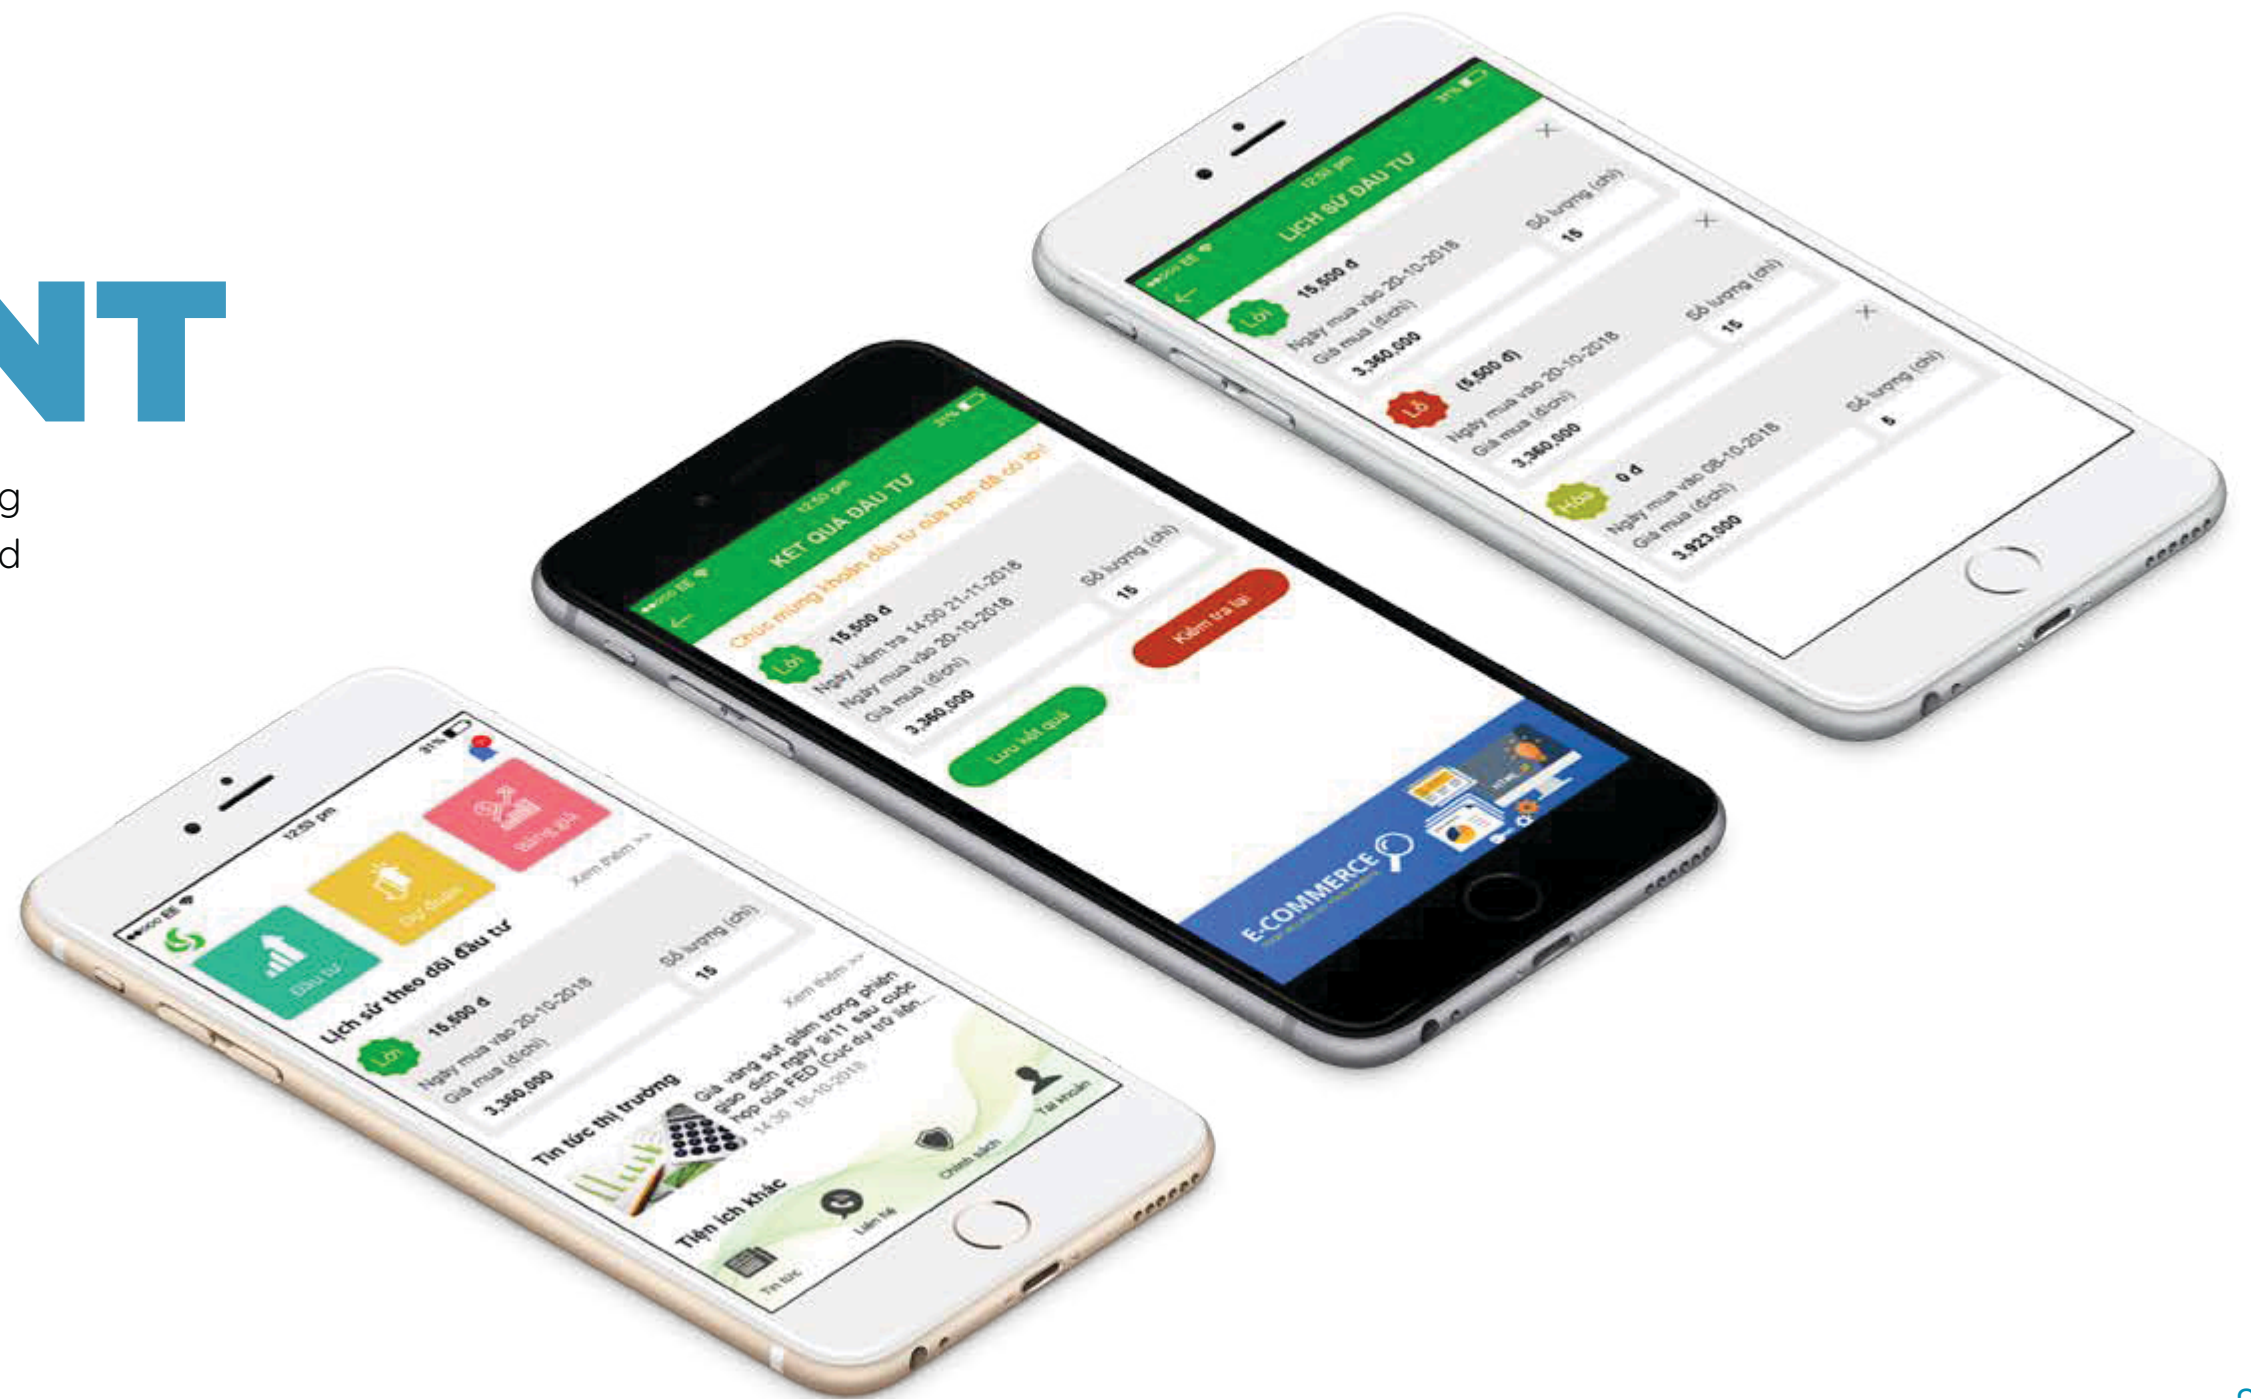

SPA & BEAUTY

The app allows users to find nearby spas, view services, prices, staff lists, and their ratings. Users can select their preferred staff and book appointments. After using the service, they can rate the spa and the staff.

INVESTMENT

The app provides market information for gold traders, helping them track their investment activities to understand profits and losses and record their business history.
